

VANCOUVER, BC--(Marketwired - July 17, 2017) - [Anfield Resources Inc.](#) (TSX VENTURE: ARY) (FRANKFURT: OAD) (OTCQB: ANLDF) ("Anfield" or "the Company") wishes to announce that it has received conditional acceptance from the TSXV for 52,124,349 Units at \$0.06, for a total equity raise of \$3,127,461. The Units consist of one common share and a one share purchase warrant, with each warrant exercisable at \$0.10 for a five-year term.

Corey Dias, Anfield's CEO, stated, "*We are very pleased to announce the closing of this financing. With these funds, Anfield will be able to continue to position itself for the expected turnaround in the uranium sector as it is clear that nuclear power will remain an integral part of the global energy mix.*"

The financing proceeds will be used for project acquisition and development and general working capital purposes. The shares have a hold period to November 18, 2017. The Company paid finder's fees of \$18,156.60 and issued 302,610 broker warrants at \$0.10, expiring on July 16, 2022.

About Anfield

Anfield is an energy metals development and near-term production company that is committed to becoming a top-tier energy-related fuels supplier by creating value through sustainable, efficient growth in its energy metals assets. Anfield is a publicly-traded corporation listed on the TSX Venture Exchange (ARY-V), the OTCQB Marketplace (ANLDF) and the Frankfurt Stock Exchange (OAD). Anfield is focused on two production centers, as summarized below:

Arizona/Colorado/Utah - Shootaring Canyon Mill

The key asset in Anfield's conventional uranium portfolio is the Shootaring Canyon Mill in Garfield County, Utah. The Shootaring Canyon Mill is strategically located within one of the historically most prolific uranium production areas in the United States, and is one of only three licensed uranium mills in the United States.

Anfield's uranium assets consist of conventional mining claims and state leases in southeastern Utah, Colorado and Arizona, targeting areas where past uranium mining or prospecting occurred. Anfield's conventional uranium assets include the Velvet-Wood Project, the Frank M Uranium Project, as well as the Findlay Tank breccia pipe. All conventional uranium assets are situated within a 125-mile radius of the Shootaring Mill.

Wyoming Properties - Irigaray ISR Processing Plant (Resin Processing Agreement)

Anfield's ISR mining projects are located in the Black Hills, Powder River Basin, Great Divide Basin, Laramie Basin, Shirley Basin and Wind River Basin areas in Wyoming, and comprise 2,667 federal mining claims, 56 Wyoming State leases and 15 private leases acquired from Uranium One in September 2016.

Anfield has agreed to enter into a Resin Processing Agreement with Uranium One wherein Anfield would process up to 500,000 pounds per annum of its mined material at Uranium One's Irigaray Central Processing Plant in Wyoming.

On behalf of the Board of Directors
