

North Bay Resources Inc. Completes Geochemical Survey of Bouleau Creek Gold Property

27.12.2011 | [Marketwired](#)

SKIPPACK, PA -- ([Marketwire](#) - Dec 27, 2011) - [North Bay Resources Inc.](#) (OTCBB: NBRI) ("North Bay" or the "Company") is pleased to announce that it has completed a geochemical survey of its 100% owned Bouleau Creek Gold Property in southeastern British Columbia, Canada.

Bouleau Creek Gold (MINFILE 082LSW069) is a road-accessible property covering 2,510 contiguous acres and located 26 kilometres west of Vernon, British Columbia. The property is adjacent to the Brett Gold project (MINFILE 082LSW110) where 11,970 tonnes grading 39.12 grams per tonne gold have been previously indicated by surface drilling and underground work.

The Southern zone of the property below Bouleau Creek features gold and silver mineralization over an area of approximately 1,000 by 600 metres. Historical assays documented in Assessment Report 21877 are reported to yield up to 34 grams (1.09 ounces) per tonne gold and 286 grams (9.19 ounces) per tonne silver. The Northern Zone above Bouleau Creek includes the Siwash prospect (MINFILE 082LSW046), which extends over an area of gold and silver mineralization measuring 3,000 by 750 metres. Historical assays in the Northern Zone are documented in Assessment Report 20226 to yield up to 5.55 grams per tonne gold and 16.6 grams per tonne silver.

Recently, the Company staked additional claims consisting of 612 acres that cover the Gold Star showing (MINFILE 082LSW130) immediately to the west of the Brett Gold property, and to within 500 meters of the main Brett Gold deposit. While these new claims are not contiguous with the rest of the Bouleau Creek property, the Company considers these claims to be part of the project area, and are referred to as the Western Zone, or Brett West. Brett Gold is currently owned and operated by Running Fox Resources Corp.

A comprehensive pilot geochemical program of the Bouleau Creek Gold property was conducted on behalf of the Company by Billiken Gold Ltd. of Enderby, BC, utilizing Heavy Metal Concentrates ("HMC") methodology. The program was commenced on October 10, 2011, and concluded on November 30, 2011. Over 2300 pounds of sample material was collected, and subsequently reduced and cataloged into 34 samples. A photo of a gold nugget from one of the samples has been posted to the Bouleau Creek Gold page on our website, at <http://www.northbayresources.com/boul.html>. The samples have now been sent to ALS Chemex in Vancouver for assay, and the results are expected back within the next four weeks.

About North Bay Resources Inc.

North Bay Resources Inc. (OTCBB: NBRI) is a fully-reporting junior mining company with over 150 mineral and placer claims encompassing approximately 60,000 acres throughout British Columbia, Canada.

In the US, the Company has acquired the Ruby Gold Mine in Sierra County, California, and is presently looking to acquire additional operating mines in the western US.

The Company's mission is to build a portfolio of viable mining prospects throughout the world and developing them through subsidiaries and JV partners to their full economic potential. North Bay's business plan is based on the Generative Business Model, which is designed to leverage its properties into near-term revenue streams even during the earliest stages of exploration and development. This provides shareholders with multiple opportunities to profit from discoveries while preserving capital and minimizing the risk involved in exploration and development.

SAFE HARBOR FOR FORWARD LOOKING STATEMENTS

This press release may contain certain forward-looking statements within the meaning of Section 27A of the Securities and Exchange Act of 1933, as amended, and Section 21E of the Securities and Exchange Act of 1934, as amended, which are intended to be covered by the safe harbors created thereby. Investors are cautioned that all forward-looking statements involve risks and uncertainties. Although North Bay Resources

Inc. believes that the assumptions underlying the forward-looking statements contained herein are reasonable, any assumption could be inaccurate, and therefore, there can be no assurance that the forward-looking statements included in this press release will prove to be accurate. In light of the significant uncertainties inherent in the forward-looking statements included herein, the inclusion should not be regarded as a representation by North Bay Resources Inc. or any other person that the objective and plans of North Bay Resources Inc. will be achieved.

Cautionary Note to U.S. Investors -The United States Securities and Exchange Commission permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We use certain terms on our website (or press releases), such as "measured," "indicated," and "inferred" "resources," which the SEC guidelines strictly prohibit U.S. registered companies from including in their filings with the SEC. U.S. Investors are urged to consider closely the disclosure in our Form S-1 and subsequent Form 10-K which may be secured from us, or from our website at www.sec.gov/edgar.shtml
