

Pan Asia Corporation Limited Environmental Best Practice at TCM Project

10.09.2012 | [ABN Newswire](#)

13:52 AEST Sept 10, 2012 ABN Newswire (C) 2004-2012 Asia Business News PL. All Rights Reserved.

Perth, Australia (ABN Newswire) - [Pan Asia Corporation Limited](#) (ASX:PZC) is pleased to announce that as part of its ongoing environmental reporting and commitment to meet world's best practice for Environmental & Health Standards, it has completed dry season baseline data collection at its flagship high CV TCM Coal Project in South Kalimantan, Indonesia.

Pan Asia CEO Alan Hopkins said, 'This shows our commitment to bring the TCM project into development while observing best environmental practice'.

The sampling has been conducted by and under the direct supervision of PT Hatfield Consultants who were commissioned by the Company to revise and update the existing TCM AMDAL (Indonesian Environmental Impact Assessment), expected to be completed by March 2013. This environmental survey is being completed to a standard that meets the Equator principles and International Finance Corporation Standards and forms a part of the Company's ongoing commitments for inclusion in the revised AMDAL. Samples were collected over a wide area (as can be seen in the following map) for ambient air, noise, river water, ground water, aquatic biota, fish and soil. Flora, fauna observations and transportation surveys were completed. Socio-economic, cultural and public health surveys were conducted on the Rejosari, Mantewe and Sakadamai Villages, these three villages are situated outside of the concession area. The following photos below show the detailed sampling undertaken.
