

# Florence Town Council settles with Florence Copper Inc. over Condemnation of Office Building

03.06.2014 | [CNW](#)

VANCOUVER, June 3, 2014 /CNW/ - [Curis Resources Ltd.](#) ("Curis" or the "Company") (TSX:CUV) announces that the Florence Town Council voted to settle its dispute with Curis' wholly-owned subsidiary Florence Copper Inc. ("Florence Copper") over the occupancy of Florence Copper's administrative buildings.

"Florence Copper is pleased to bring these legal proceedings to a close," commented Rita Maguire, Executive Vice President and General Counsel of Florence Copper. "We continue to look for meaningful ways to work cooperatively with the Town's leadership and to develop a productive long-term relationship that contributes to the economic health and viability of the community."

At the Town Council meeting on Monday June 2, 2014, the Florence Town Council voted unanimously (7-0) to settle its dispute with Florence Copper over the occupancy of the administrative buildings at the site of its future in-situ copper operation. The lawsuit was filed by Florence Copper in Pinal Superior Court (CV2012-010977) after the Town condemned its administrative offices and denied access to the site for alleged health and safety concerns. The Town, through its insurance carrier, will pay Florence Copper \$100,000 for damages arising from a 30-day lockout. Florence Copper has since re-occupied the buildings.

## About Florence Copper Inc.

Florence Copper is engaged in the final stages of permitting for the Phase 1 Production Test Facility ("PTF") for an in-situ copper recovery project in Arizona, USA. The PTF includes a 24-well in-situ recovery well field and a state of the art solvent extraction/electrowinning plant that will produce copper cathode. The PTF will assist in the demonstration of the science and safety of the in-situ process and provide an opportunity for the public to fully engage and understand this modern copper extraction technology. Concurrently, Florence Copper continues to advance engineering, testwork, environmental studies and permitting for Phase 2 commercial operations.
