## Capital Expenditures

We spent approximately \$1.2 million on capital expenditures for the three months ended June 30, 2014. The Company estimates an additional \$0.7 million to \$2.7 million in capital expenditures will be incurred during the remainder of 2014, for an estimate of \$4.0 to \$6.0 million for the full year 2014.

## Liquidity and Capital Resources

At June 30, 2014, as outlined in the following table, we had total cash and cash equivalents of \$2.1 million and \$8.8 million of restricted cash, compared with \$10.5 million and \$10.0 million at December 31, 2013, respectively.

	June 30, 2014	December 31, 2013
Cash, operating	\$ 2,060	\$ 10,485
Cash, restricted:		
Kentucky sale proceeds	\$ 2,308	\$ 518
Kentucky sale proceeds held in escrow	\$ -	\$ 3,001
Deposits	\$ 1,440	\$ 1,440
Reclamation bond collateral	\$ 5,009	\$ 5,009
Total Cash, Restricted	\$ 8,757	\$ 9,968

In accordance with the Notes, the restricted cash received from the Kentucky sales proceeds was used to make capital expenditures. At June 30, 2014 we have \$2.3 million compared to \$0.5 million on December 31, 2013. In June 2014, the Company received \$2.5 million of the Kentucky sale collateral proceeds that were held in escrow.

The Company remains highly leveraged. Our Notes have an outstanding balance of \$195.0 million and provide for semi-annual interest payments of \$9.0 million in mid-November and mid-May. Our senior notes have an outstanding balance of \$20.0 million and provide for quarterly interest payments of \$0.5 million.

In the second quarter of 2014, the Company experienced positive gross margins from both active mining operations by achieving lower cash costs and higher revenues. We continued to reduce inventories but the shipping delays and rail service disruptions experienced in the first quarter of 2014 continued into the early second quarter of 2014. This continued impact of delays resulted in reduced revenues of approximately \$3.8 million and deferred the sale and shipment of approximately 38,000 tons. At June 30, 2014, we have approximately 123,000 tons of inventory on hand with a current market value of about \$8.0 million.

On March 31, 2014, we received \$4.95 million from the sale of common shares pursuant to a private placement. We continue to negotiate with financial institutions and advisors in efforts to arrange financing to provide adequate liquidity that when combined with existing cash balances, will be sufficient to make the

\$9.0 million interest payment on our Notes in November 2014. We also continue to explore strategic alternatives that may include an additional sale of equity securities, the sale of debt securities, the sale of surplus or obsolete mining equipment, owned reserves and other assets and/or the restructuring of our debt.
