

VANCOUVER, BRITISH COLUMBIA--(Marketwired - Apr 2, 2015) - [Atlantic Gold Corp.](#) (TSX VENTURE:AGB) ("Atlantic" or the "Company") is pleased to announce that it has filed a National Instrument 43-101 ("NI 43-101") Technical Report on the mineral resource estimate in respect of the Company's Fifteen Mile Stream gold deposit (the "Resource Estimate"), located 95km northeast of Halifax. The Technical Report is available for review on SEDAR ([www.sedar.com](http://www.sedar.com)) and on the Company's website ([www.atlanticgoldcorporation.com](http://www.atlanticgoldcorporation.com)).

The results of the Resource Estimate were announced in a press release dated February 18, 2015. There are no material differences between the results announced in the news release and the results in the Technical Report.

On behalf of the Board of Directors

*Steven Dean*, Chairman and Chief Executive Officer

*Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.*
