TORONTO, Oct. 6, 2015 /CNW/ - [Jaguar Mining Inc.](#) ("Jaguar" or the "Company") (TSX-V: JAG) reported gold production of 25,235 ounces in Q3 2015 (Q3 2014 22,374 ounces) while 223,000 tonnes of ore was processed in Q3 2015 (Q3 2014 249,000 tonnes) at an average grade of 3.90 grams per tonne (Q3 2014 3.13 grams per tonne).

During Q3 2015, total tonnes milled decreased by 10% compared to Q3 2014, whereas the average grade milled increased by 25% compared to the same period in 2014. This was primarily due to availability of higher grade stopes, improved ground conditions and an overall focus on grade control. Mill recoveries for the quarter averaged 90% (Q3 2014 - 89%).

Commenting on Q3 2015 production results, George Bee, President and CEO of Jaguar, stated: "We continue to make progress on the Company's turn-around by improving grade and focusing on profitable production with improvements in mining and business practice. The devaluation of the Brazilian Real in conjunction with our operational improvements is expected to lead to the continued per-ounce cost reductions. As we look to conclude the recently announced financing, thereby increasing our net-working-capital, we also look to build on our recent exploration drilling success defining better grade opportunities ahead of production."

Details of the Company's financial performance, including capital and operating costs, will be included in its third quarter 2015 financial results. Outlined below is the Company's cash and gold bullion position as at September 30, 2015.
