

Cyprium Mining Corporation announces it is unaware of any material change in operations

07.11.2016 | [CNW](#)

MONTREAL, Nov. 7, 2016 - [Cyprium Mining Corp.](#) (TSX-V CUG and CUG.DB) ("Cyprium" or the "Corporation"), a Canadian-based mining company with operations located in the state of Chihuahua, Mexico, at the request of IIROC, wishes to confirm that the Company's management is unaware of any material change in the Company's operations that would account for the recent increase in market activity.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

This news release may contain assumptions, estimates, and other forward-looking statements regarding future events. Such forward-looking statements involve inherent risks and uncertainties and are subject to factors, many of which are beyond the Company's control that may cause actual results or performance to differ materially from those currently anticipated in such statements.

About Cyprium Mining Corporation

For further description of Cyprium Mining's business, please visit our website at:
<http://www.cypriummining.com/en/investors/disclaimers>

Neither TSX Venture Exchange Inc. nor its Regulation Services Provider (as that term is defined in policies of the TSX Venture Exchange Inc.) accepts responsibility for the adequacy or accuracy of this release.

This news release contains "forward-looking information" (within the meaning of applicable Canadian securities laws) and "forward-looking statements" (within the meaning of the U.S. Private Securities Litigation Reform Act of 1995). Such statements or information are identified with words such as "anticipate", "believe", "expect", "plan", "intend", "potential", "estimate", "propose", "project", "outlook", "foresee" or similar words suggesting future outcomes or statements regarding an outlook. Such statements include, among others, those concerning the Company's anticipated plans for developments of the Company and its mining projects.

Such forward-looking information or statements are based on a number of risks, uncertainties and assumptions which may cause actual results or other expectations to differ materially from those anticipated and which may prove to be incorrect. Assumptions have been made regarding, among other things, management's expectations regarding future growth, plans for and completion of projects by Company's third party relationships, availability of capital, and the necessity to incur capital and other expenditures. Actual results could differ materially due to a number of factors, including, without limitation, operational risks in the completion of Company's anticipated projects, delays or changes in plans with respect to the development of Company's anticipated projects by Company's third party relationships, risks affecting the ability to develop projects, risks inherent in operating in foreign jurisdictions, the ability to attract key personnel, and the inability to raise additional capital. No assurances can be given that the efforts by the Company will be successful. Additional assumptions and risks are set out in detail in the Company's MD&A, available on SEDAR at www.sedar.com.

Although the Company believes that the expectations reflected in the forward-looking information or statements are reasonable, prospective investors in the Company's securities should not place undue reliance on forward-looking statements because the Company can provide no assurance that such expectations will prove to be correct. Forward-looking information and statements contained in this news release are as of the date of this news release and the Company assumes no obligation to update or revise this forward-looking information and statements except as required by law. Investors should note that, while the mineralized material being processed by the Company is assayed, there is no certainty that the proposed operations will be economically or technically viable. Investors should also note that the Potosi silver mine and La Chinche property have no established mineral resources or mineral reserves as defined by NI 43-101. Although Cyprium Mining has made a production decision regarding the Potosi silver mine based on historical production records, historical results of sampling and drilling, a feasibility study of its projects has

not been completed and there is no certainty that the proposed operations will be economically or technically viable.
