CARSON CITY, Nev., Nov. 21, 2016 (GLOBE NEWSWIRE) -- Mexus Gold US (OTCQB:MXSG)(“Mexus” or the “Company”) along with its JV partner MarMar recently decided that the best option for gold recovery at the Santa Elena mine will be a Merrill Crowe system. The decision to use this system instead of Electrowinning was made in part because a Merrill Crowe system will allow Mexus the opportunity to scale the recovery plant as production increases. Mexus now plans to ship a 400-600gpm Merrill Crowe plant from its Walnut Grove shop to the Santa Elena mine site. This plant was purchased by Mexus in 2014 and had been readied for use when needed. The recovery plant has been disassembled, loaded, and is ready to be shipped around November 27th.

CEO Paul Thompson toured the mine site Friday, November 18th. Mr. Thompson and engineers from MarMar were able to determine the optimal size and placement of the pad for the recovery system. Mexus and MarMar continue to explore every opportunity in regards to costs and production. Added CEO Thompson, “I’m thrilled with the decision to use a Merrill Crowe recovery system. This system is best suited for our long term production goals and gives us flexibility in the size of plant we will ultimately need. The installation of this system is really quite simple. It was disassembled with all parts being marked for ease of installation. This system will payoff many times over in the years to come.”

About Mexus Gold US

Mexus Gold US is an American based exploration company with holdings in Mexico. Mexus recently joint ventured its flagship property with MarMar holdings of Mexico. The fully owned Santa Elena mine is located 54km NW of Caborca, Mexico. The JV is currently lining the heap leach pads and ponds with the initial stacking of ore to be completed by the end of October, 2016. Mexus recently added another mine to its portfolio. The San Marco mine is a gold and silver mine which sits in the municipality of Pitiquito, 200km S of Puerto Penasco and 250km NW of Hermosillo, Sonora in the community of Puerto Libertad. This property encompasses a total of 970 acres. The previous owner had identified 110,000oz. of gold through prior geological evaluations. The property is in a 50/50 joint venture with MarMar holdings. Permits for this project are being submitted as of September, 2016. Mexus also owns rights to the Ocho Hermanos property located 80km N of Hermosillo, Mexico. This property contains 6900 acres and has both gold and copper on the mine. The permit to build and access road will be submitted in October, 2016 with the plan to drill the property for future use. Founded in 2009, Mexus Gold US is committed to protecting the environment, mine safety and employing members of the communities in which it operates.
