

Potash Ridge Announces Closing of Fully Subscribed Private Placement

14.11.2017 | [CNW](#)

TORONTO, Nov. 13, 2017 /CNW/ - [Potash Ridge Corp.](#) ("Potash Ridge" or the "Corporation") (TSX: PRK), a near term producer of premium fertilizer in North America, today announced the closing of the non-brokered private placement (the "Private Placement") originally announced on October 16, 2017.

The Private Placement was for gross proceeds of \$2,300,000. The Private Placement offering of units ("Units") was at a price of \$0.10 per Unit. Each Unit is comprised of one common share in the capital of Potash Ridge (a "Common Share") and one-half of one Common Share purchase warrant, with each whole warrant ("Warrant") entitling the holder to purchase one Common Share at \$0.20 for a period of three years from the date of closing. The Corporation issued 23,000,000 Common Shares and 11,500,000 Warrants upon closing.

In connection with the Private Placement, the Corporation has agreed to pay cash commissions totaling \$105,900.

All securities issued in connection with the Private Placement are subject to restricted period that expires four months plus one day following the date of issuance. The Private Placement is subject to requisite regulatory approvals.

The proceeds from the private placement will be used to advance the Blawn Mountain project and for general corporate purposes.

On behalf of the Board of Directors

POTASH RIDGE CORPORATION

"Andrew Squires"

Andrew Squires
CEO, President and Chief Operating Office

About Potash Ridge

Potash Ridge's strategy is to become a premier producer of potassium sulphate or SOP in North America. The Corporation owns two SOP projects: the Valleyfield project that plans to produce SOP through the Mannheim Process; and the Blawn Mountain project in Utah that plans to produce SOP by processing an alunite material. Potash Ridge has a highly qualified and proven management team in place with significant financial, project management and operational experience and the ability to take projects into production.

Forward-Looking Statements

This press release contains forward-looking statements, which reflect the Corporation's expectations regarding future growth, results of operations, performance and business prospects. These forward-looking statements include statements related to advancing the Valleyfield Project and may also include statements that are predictive in nature, or that depend upon or refer to future events or conditions, and can generally be identified by words such as "may", "will", "expects", "anticipates", "intends", "plans", "believes", "estimates", "guidance" or similar expressions. In addition, any statements that refer to expectations, projections or other characterizations of future events or circumstances are forward-looking statements. These statements are not historical facts but instead represent the Corporation's expectations, estimates and projections regarding future events. Forward-looking statements are necessarily based upon a number of estimates and

assumptions that, while considered reasonable by the Corporation, are inherently subject to significant business, economic and competitive uncertainties and contingencies. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements. Such factors include, but are not limited to: the state of the equity capital markets; the receipt of any required approvals for the private placement; the future financial or operating performance of the Corporation and its subsidiaries and its mineral projects; the anticipated results of exploration activities; the estimation of mineral resources; the realization of mineral resource estimates; capital, development, operating and exploration expenditures; costs and timing of the development of the Corporation's mineral projects; timing of future exploration; requirements for additional capital; climate conditions; government regulation of mining operations; anticipated results of economic and technical studies; environmental matters; receipt of the necessary permits, approvals and licenses in connection with exploration and development activities; appropriation of the necessary water rights and water sources; changes in commodity prices; recruiting and retaining key employees; construction delays; litigation; competition in the mining industry; reclamation expenses; reliability of historical exploration work; reliance on historical information acquired by the Corporation; optimization of technology to be employed by the Corporation; title disputes or claims and other similar matters.

If any of the assumptions or estimates made by management prove to be incorrect, actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained herein. Such assumptions include, but are not limited to, the following: that general business, economic, competitive, political and social uncertainties remain favorable; that agriculture fertilizers are expected to be a major driver in increasing yields to address demand for premium produce, such as fruits and vegetables, as well as diversified protein rich diets necessitating grains and other animal feed; that actual results of exploration activities justify further studies and development of the Corporation's mineral projects; that the future prices of minerals remain at levels that justify the exploration and future development and operation of the Corporation's mineral projects; that there is no failure of plant, equipment or processes to operate as anticipated; that accidents, labour disputes and other risks of the mining industry do not occur; that there are no unanticipated delays in obtaining governmental approvals or financing or in the completion of future studies, development or construction activities; that the actual costs of exploration and studies remain within budgeted amounts; that regulatory and legal requirements required for exploration or development activities do not change in any adverse manner; that input cost assumptions do not change in any adverse manner, as well as those factors discussed in the section entitled "Risk Factors" in the Corporation's Annual Information Form (AIF) for the year-ended December 31, 2016 found on [sedar.com](http://www.sedar.com). The Corporation disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by applicable law.
