

# RedZone Announces Completion of Mapping and Identification of 37+ New Dykes

14.02.2018 | [GlobeNewswire](#)

VANCOUVER, British Columbia, Feb. 14, 2018 (GLOBE NEWSWIRE) -- RedZone Resources Inc. (TSX VENTURE:REZ) ("the Company" or "RedZone") is pleased to announce that it has completed its previously announced mapping and sampling program of its Arizona land package. A total of 60 samples have been sent to Skyline Assayer & Laboratories in Tucson, AZ for assay. The field team that undertook the mapping has identified at least 37 additional dyke outcrops on the property package. Many of these outcrops appear to be surface expressions of additional dyke bodies, and work is continuing to determine the geometry and continuity of these bodies. These outcrops have been sampled with assays pending, as noted above.

Upon receipt of assays, the Company will finalize plans for the next stage of exploration which will include trenching and drilling.

All scientific and technical disclosure herein has been prepared under the supervision of Bernie Stannus, P.Eng. a consultant to EEC, the Company's local contractor, a "qualified person" within the meaning of National Instrument 43-101.

## About RedZone

The Company is a mineral exploration company with a focus on metals that make up and support the rapid evolution to batteries. The Common Shares are listed on the TSX-V under the ticker symbol "REZ" and more information about the Company is available on its issuer profile on SEDAR at [www.sedar.com](http://www.sedar.com) or at [www.redzoneresources.ca](http://www.redzoneresources.ca).
