

Mexus releases report on Ures property showing high grade gold; Santa Elena update

05.03.2018 | [GlobeNewswire](#)

CABORCA, Mexico, March 05, 2018 (GLOBE NEWSWIRE) -- [Mexus Gold US](#) (OTCQB:MXSG) ("Mexus" or the "Company") released a report written by geologist Cesar Lemas on its Ures property located near Hermosillo, Mexico. The preliminary geological report details initial sampling done on the properties 3 concessions- 370, 8 Brothers, and Scorpio.

Assaying done at the 370 concession, which Mexus will initially mine, showed promising results. The tests were highlighted by 3 samples showing 9, 47, and 10 grams of Au each with 41, 33, and 8 grams Ag as well.

The report is highlighted with the statement that all 3 concessions could contain porphyry type systems. Mr. Lemas added, "Additional drilling should confirm the extent of these porphyry systems. I'm thrilled that Mexus has 3 high grade systems within close proximity to each other. The company will be able to expand its geological reporting as we build out the initial mine."

The heap pad at the Santa Elena project continues to leach with processing to occur in the near future.
