

# Nevada Exploration's Wade Hodges and James Buskard presenting at Resources for Future Generations conference in Vancouver on June 19, 2018

14.06.2018 | [GlobeNewswire](#)

VANCOUVER, B.C., June 14, 2018 - Nevada Exploration Inc. (TSX.V:NGE) (OTCQB:NVDEF) is pleased to invite its stakeholders to attend upcoming presentations by NGE's CEO, Wade Hodges, and President, James Buskard, at the Resources for Future Generations conference (RFG2018) being held in Vancouver, Canada, from June 16 to 21, 2018, at the Vancouver Convention Centre.

PREMIER CONFERENCE ON ENERGY • MINERALS • WATER • THE EARTH

RFG2018 is being organized by the International Union of Geological Sciences (IUGS), the Canadian Federation of Earth Sciences (CFES), the Canadian Institute of Mining, Metallurgy and Petroleum (CIM), the Geological Association of Canada (GAC) and the Mineralogical Association of Canada (MAC), and is being supported by a long list of technical partners – see: <http://www.rfg2018.org/en/RFG/2018/Rfg-Highlights/Partner-Organizations>.

Recognizing its important place in exploring for new resources, as well as in mining in general, the conference organizers have dedicated three technical sessions to hydrogeochemistry. This represents a significant milestone for hydrogeochemistry, as it marks the first time a major international resource-focused conference has gone to such lengths to highlight its role in terms of the future of the industry.

Wade Hodges and James Buskard are each presenting their papers on the morning of June 19, 2018, in the session titled WA14: Hydrogeochemistry: Environment and Exploration I – for times and location see: [http://rfg2018.gibsongroup.ca/admin/calendar\\_stream.php?id=89](http://rfg2018.gibsongroup.ca/admin/calendar_stream.php?id=89)

About Nevada Exploration Inc.

NGE is an exploration company advancing a portfolio of new district-scale gold exploration projects along

Nevada's Cortez Trend. NGE is led by an experienced management team that has been involved in several significant discoveries in Nevada, including the discovery of Lone Tree and Rabbit Creek (part of the Twin Creeks Mine). NGE's team has spent the last decade integrating the use of hydrogeochemistry with conventional exploration tools to develop a Nevada-specific regional-scale geochemistry exploration program. With innovative technology, NGE has completed the world's largest groundwater sampling program for gold exploration, collecting approximately 6,000 samples to evaluate Nevada's covered basins for new gold exploration targets. To advance follow-up targets, NGE has overcome the high drilling costs that have previously prohibited the wide-spread use of drilling as a prospecting tool by developing its Scorpion drill rig, a small-footprint, truck-mounted, small-diameter RC drill rig specifically tailored to the drilling conditions in Nevada's basins (analogous to RAB drilling in other parts of the world). By integrating hydrogeochemistry and early-stage low-cost drilling with conventional exploration methods, NGE is overcoming the challenges and radically reducing the costs of exploring in Nevada's covered basins, and taking significant steps to open this important new search space up for district-scale exploration.

*Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.*

*Wade A. Hodges, CEO & Director, [Nevada Exploration Inc.](https://www.nevadaexploration.com), is the Qualified Person, as defined in National Instrument 43-101, and has prepared the technical and scientific information contained in this News Release.*

*Cautionary Statement on Forward-Looking Information:*

*This news release contains "forward-looking information" and "forward-looking statements" (collectively, "forward-looking information") within the meaning of applicable securities laws, including, without limitation, expectations, beliefs, plans, and objectives regarding projects, potential transactions, and ventures discussed in this release.*

*In connection with the forward-looking information contained in this news release, the Company has made numerous assumptions, regarding, among other things, the assumption the Company will continue as a going concern and will continue to be able to access the capital required to advance its projects and continue operations. While the Company considers these assumptions to be reasonable, these assumptions are inherently subject to significant uncertainties and contingencies.*

*In addition, there are known and unknown risk factors which could cause the Company's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information contained herein. Among the important factors that could cause actual results to differ materially from those indicated by such forward-looking statements are the risks inherent in mineral exploration, the need to obtain additional financing, environmental permits, the availability of needed personnel and equipment for exploration and development, fluctuations in the price of minerals, and general economic conditions.*

*A more complete discussion of the risks and uncertainties facing the Company is disclosed in the Company's continuous disclosure filings with Canadian securities regulatory authorities at [www.sedar.com](https://www.sedar.com). All forward-looking information herein is qualified in its entirety by this cautionary statement, and the Company disclaims any obligation to revise or update any such forward-looking information or to publicly announce the result of any revisions to any of the forward-looking information contained herein to reflect future results, events or developments, except as required by law.*
