

# CORRECTION: 3.2M True Width Grading 11.4g/tAu Intersected at Maka South Prospect, Douta Gold Project, Senegal

28.08.2018 | [GlobeNewswire](#)

In a release issued today with the same headline, [Thor Explorations Ltd.](#) (TSX-V:THX) incorrectly stated a figure in the second paragraph. The g/tAu in the first sentence should have been 11.4, not 9.2. The corrected release follows:

Douta Permit Location Map

Plan View of the Maka Prospect and Drillhole Locations

## Highlights

- Near-surface gold mineralisation intersected in reconnaissance RC drill program
- 3.2 metres true width at 11.4g/tAu
- Potential new discovery adjacent to Basari Resources Makabingui Project

VANCOUVER, Aug. 28, 2018 - [Thor Explorations Ltd.](#) (TSX VENTURE: THX) ("Thor" or the "Company") is pleased to announce it has drilled a potential discovery hole at a new prospect called Maka South located in the north east of the Douta Permit on its Douta Gold Project in south-east Senegal. The hole was drilled as part of a 1,000 RC metre reconnaissance reverse circulation (RC) program on a number of previously defined drill targets by soil geochemistry in the Maka area of the licence.

Drillhole DMRC012 on the Maka South Target intersected 4 metres true width at 11.4g/tAu from 18m downhole (Table 1). In addition to this result, seven other RC holes intersected anomalous gold mineralisation including 1m at 3.59g/t Au in drillhole DMRC013 (Appendix 1) on other targets in the area.

These first pass drill results are considered to be significant as they are located adjacent to the nearby Makabingui Gold Project comprising total resources of 11.9 million tonnes at 2.6g/t Au for a contained 1 million oz Au in an area of the Douta Permit that has received very little exploration attention to date.

Segun Lawson, President & CEO, stated: "A second prospect in the Douta permit further strengthens management's assessment of the prospectivity of Thor's Douta Permit as a whole. In addition to this, we are still looking forward to receiving the pending results from approximately 4,000 metres of RC drilling that were drilled at Makosa prior to the start of the rainy season in July. We will be in a good position to evaluate our options on the Douta Permit as a whole following the rainy season."

Table 1: Significant Drillhole Intersection

HOLE ID	Easting	Northing	RL	Total Depth (m)	Azimuth	Dip	From (m)	To (m)	Downhole Interval (m)	True Thickness (m)	Average Grade (Aug/t) AAS
DMRC012	185324	1447895	126	80	150	-50	18	22	4.00	3.2	11.4
Includes							20	22	2.00	1.6	20.1

and 43 44 1.00 0.8 1.1

50gm Fire assays (AA-26) were carried out by ALS Bamako, Mali. Thor adopts industry standard QAQC sampling and QAQC protocols.

The Douta Gold Project, Senegal (&ldquo;Douta&rdquo;) is located in the prospective, gold-endowed Birimian Greenstone belt in south east Senegal, West Africa. Douta lies within 5 kilometres of Randgold&rsquo;s 3.6Moz Massawa resource. Gold mineralisation at Douta is considered to be controlled by the Main Transcurrent Shear Zone (MTZ), a regionally significant crustal structure (refer to Figure 1).

To date, diamond and RC drilling have been used to delineate gold mineralisation at the Douta Project in Senegal. A total of 13 diamond holes for 1,531m and 24 RC drillholes for 2,000m were completed over the Makosa Prospect and 7,800m of the planned 8,000m have been completed in the 2018 RC Program over a strike length of approximately 2.2km (refer to Figures 1 and 2).

In addition to the drilling carried out at Makosa, Thor carried out a 1,000 metre scout drilling program on three drilling targets in the Maka Area that had been delineated by previous drill target generation that included soil geochemistry carried out by the Company.

The Maka South prospect has now been prioritised for follow up exploration work following the drilling of the potential discovery hole (refer to Figure 2).

#### QUALIFIED PERSON

The above information has been prepared under the supervision of Alfred Gillman (Fellow AusIMM, CP), who is designated as a &ldquo;qualified person&rdquo; under National Instrument 43-101 and has reviewed and approves the content of this news release. He has also reviewed QA/QC, sampling, analytical and test data underlying the information.

#### About Thor

[Thor Explorations Ltd.](#) is a Canadian mineral exploration company engaged in the acquisition, exploration and development of mineral properties located in Nigeria, Senegal and Burkina Faso. Thor holds a 100% interest in the Segilola Gold Project located in Osun State Nigeria, a 70% interest in the Douta Gold Project located in south-eastern Senegal, and a 49% interest in the Bongui and Legue gold permits located in Houndé greenstone belt, south west Burkina Faso. Thor trades on the TSX Venture Exchange under the symbol "THX".
