

Sierra Metals Reports Strong 2018 Production Results and Announces 2019 Production Guidance

24.01.2019 | [CNW](#)

- Continuing a 10-year track record of consolidated annual ore throughput growth
- Record quarterly ore throughput at both the Bolivar and Cusi Mines

TORONTO, Jan. 24, 2019 - Sierra Metals Inc. (TSX: SMT) (BVL: SMT) (NYSE AMERICAN: SMTS) ("Sierra Metals" or "Company") is pleased to report fourth quarter 2018 and full year 2018 production results, as well as 2019 production guidance. 2019 cost and capital expenditure guidance will be provided in February as the planning and costing of various capital projects which have been recently added or modified, are currently being completed.

Results are from Sierra Metals' three underground mines in Latin America: The Yauricocha polymetallic mine in Peru, and Bolivar copper and Cusi silver mines in Mexico.

2018 Consolidated Production Highlights

- Silver production of 2.7 million ounces; a 17% increase from 2017
- Copper production of 34.0 million pounds; a 27% increase from 2017
- Zinc production of 76.8 million pounds; a 1% increase from 2017
- Lead production of 27.7 million pounds; a 7% decrease from 2017
- Gold production of 7,743 ounces; a 25% increase from 2017
- Total of 2.3 million tonnes processed; a 16% increase from 2017

Fourth Quarter 2018 Production Highlights

- Silver production of 0.7 million ounces; a 41% increase from Q4 2017
- Copper production of 8.9 million pounds; a 20% increase from Q4 2017
- Zinc production of 17.5 million pounds; a 10% decrease from Q4 2017
- Lead production of 7.9 million pounds; a 39% increase from Q4 2017
- Gold production of 2,137 ounces; a 34% increase from Q4 2017

The Company achieved record consolidated quarterly ore throughput during Q4 2018, as well as record quarterly ore throughput from the Bolivar and Cusi Mines. These results continued the Company's successful production increases realized during the first three quarters of 2018, which resulted in strong annual consolidated production figures.

Metal production at Yauricocha increased 14% in Q4 2018 compared to Q4 2017 due to 5% higher ore throughput, higher grades of all metals, except zinc, and higher lead and gold recoveries. At Bolivar, 20% higher ore throughput, and higher gold head grades resulted in a 16% increase in copper equivalent pounds produced in Q4 2018 compared to Q4 2017. The Cusi Mine realized a 258% increase in throughput which resulted in a 70% increase in silver equivalent ounces produced during Q4 2018 compared to Q4 2017.

During 2018, the annual consolidated production of silver, copper, zinc and gold increased 17%, 27%, 1%, and 25%, respectively, while annual consolidated lead production decreased 7% compared to 2017.

Igor Gonzales, President and CEO of Sierra Metals, commented: "I am very pleased with the Company's strong Q4 production results, which contributed to a solid year of production in 2018. The Company continues to reap the benefits of the successful operational improvement programs at all Mines.

The Company has completed expansion work at the Bolivar Mine and is ramping up to 3,600 tonnes per day while also implementing a throughput expansion at Cusi to 1,200 tonnes per day. The Company has also completed all of the necessary work and has submitted all of the required documentation to the authorities in Peru for its Yauricocha mine and expects to receive its Environmental Impact Assessment permit shortly. Furthermore, the Company has almost completed updated Life of Mine Plans, and is working to complete Pre-Feasibility and Feasibility studies, based on the encouraging PEA's results released for the three Mines, demonstrating positive economics, and supporting the potential for future important production expansions.

At Yauricocha, during Q4 2018, we have completed the refurbishment of the lower part of the Mascota Shaft as well as the infrastructure and tie-ins for the Yauricocha tunnel, allowing for faster turn-around in the cycle time of the trolley locomotives providing for increased capacity and handling of larger volumes of ore and waste. Tonnage through the tunnel can be increased further as larger locomotives and ore cars are added in the future.

In Q1 2019 the Yauricocha shaft continues to be sunk to the 1270 level to provide access to further reserves and resources at the Mine and loading pockets will be added later this year on the 1210 level. Also, work will commence on a ramp connecting the 920 level with the 720 level at Yauricocha providing for an additional 10,000 tonnes per month of increased capacity to move ore and waste from the mine."

He concluded, "2019 will be an important year for the Company as we ramp up production in Mexico while continuing to and improve all Mines implementing best operational practices. These changes should allow the Company to increase production to new highs. Our Company wide ongoing brownfield exploration programs should also lead to further significant increases in reserves and resources, which will add to the value of our assets during the year ahead."

Consolidated Production Results

Consolidated Production	3 Months Ended			12 Months Ended			2018 Guidance

Zinc equivalent pounds (000's) ⁽¹⁾	56,287	47,287	19%	215,053	193,152	11%	183,830	214,468

(1) Silver equivalent ounces and copper and zinc equivalent pounds for Q4 2018 were calculated using the following realized prices: \$14.63/oz Ag, \$2.77/lb Cu, \$0.89/lb Pb, \$1.16/lb Zn, \$1,238/oz Au. Silver equivalent ounces and copper and zinc equivalent pounds for Q4 2017 were calculated using the following realized prices: \$16.77/oz Ag, \$3.13/lb Cu, \$1.11/lb Pb, \$1.45/lb Zn, \$1,282/oz Au. Silver equivalent ounces and copper and zinc equivalent pounds for 12M 2018 were calculated using the following realized prices: \$15.65/oz Ag, \$2.96/lb Cu, \$1.02/lb Pb, \$1.31/lb Zn, \$1,269/oz Au. Silver equivalent ounces and copper and zinc equivalent pounds for 12M 2017 were calculated using the following realized prices: \$17.14/oz Ag, \$2.82/lb Cu, \$1.06/lb Pb, \$1.32/lb Zn, \$1,265/oz Au

Yauricocha Mine, Peru

The Yauricocha Mine processed a total of 1,106,649 tonnes during 2018, representing an 8% increase from 2017, and 599,297 tonnes in Q4 2018, representing a 5% increase compared to Q4 2017. Zinc equivalent metal production in Q4 2018 increased 14% due to higher ore throughput, higher head grades for all metals, except zinc, and higher lead and copper recoveries. Higher lead head grades and lead production realized during Q4 2018 was the result of increased production from the chichicos that contained higher lead grades during the quarter. Higher copper head grades and lower zinc head grades were due to the inclusion of certain copper-enriched zones at Esperanza, polymetallic ore from the Central Mine Zone, and a small

polymetallic ore from the cuerpos chicos.

Year over year zinc equivalent production was 7% higher in 2018 compared to the prior year. Copper Production was 4% higher, zinc production 2% higher, and gold production was 18% higher. This was partially offset by a 5% decrease in silver production and a 5% decrease in lead production from 2017.

A summary of production from the Yauricocha Mine for Q4 2018 has been provided below:

Yauricocha Production	3 Months Ended			12 Months Ended		
	Q4 2018	Q4 2017	% Var	Q4 2018	Q4 2017	% Var
Tonnes processed (mt)	268,363	254,933	5%	1,106,649	1,023,491	8%
Daily throughput	3,067	2,914	5%	3,162	2,924	8%
Silver grade (g/t)	64.06	53.57	20%	60.32	67.13	-10%
Copper grade	1.06%	0.80%	33%	0.97%	0.79%	22%
Lead grade	1.51%	1.19%	27%	1.30%	1.48%	-12%

(1) Silver equivalent ounces and copper and zinc equivalent pounds for Q4 2018 were calculated using the following realized prices: \$14.63/oz Ag, \$2.77/lb Cu, \$0.89/lb Pb, \$1.16/lb Zn, \$1,238/oz Au. Silver equivalent ounces and copper and zinc equivalent pounds for Q4 2017 were calculated using the following realized prices: \$16.77/oz Ag, \$3.13/lb Cu, \$1.11/lb Pb, \$1.45/lb Zn, \$1,282/oz Au. Silver equivalent ounces and copper and zinc equivalent pounds for 12M 2018 were calculated using the following realized prices: \$15.65/oz Ag, \$2.96/lb Cu, \$1.02/lb Pb, \$1.31/lb Zn, \$1,269/oz Au. Silver equivalent ounces and copper and zinc equivalent pounds for 12M 2017 were calculated using the following realized prices: \$17.14/oz Ag, \$2.82/lb Cu, \$1.06/lb Pb, \$1.32/lb Zn, \$1,265/oz Au

Bolivar Mine, Mexico

The Bolivar Mine processed 1,031,750 tonnes in 2018, representing a 16% increase over 2017. Q4 2018 record throughput was 272,645 tonnes, which was 20% higher when compared to Q4 2017. The higher throughput and higher gold and silver head grades resulted in a 16% increase in copper equivalent production in Q4 2018 compared to Q4 2017. The increase in throughput was due to the work performed to increase the profile of the ramps and main access drives to 5 meters wide x 5 meters high within the mine to provide access to larger conventional road dump trucks as well as articulating 6-wheel trucks to move higher volumes of ore out of the mine. The development work performed during the year resulted in increased access to more minable stopes which also contributed to the higher throughput. The Company is pleased with the progress made on the expansion plans at the Bolivar Mine. With the early completion of construction at the Piedras Verdes Mill, we expect to deliver on the goal of a 20% increase in production from 3,000 TPD to 3,600 TPD, in Q1 2019.

Copper equivalent production at the Bolivar Mine increased 16% in 2018 compared to 2017, with copper production 14% higher, silver production 38% higher, and gold production 38% higher. In Q4 2018, copper production increased by 8% to 4,230,000 pounds, silver production increased 53% to 128,000 ounces, and gold production increased 47% to 1,163 ounces compared to Q4 2017. The 16% increase in copper equivalent production was driven by higher throughput, and higher silver and gold head grades.

A summary of production for the Bolivar Mine for Q4 2018 has been provided below:

Bolivar Production	3 Months Ended			12 Months Ended		
	Q4 2018	Q4 2017	% Var	Q4 2018	Q4 2017	% Var

Copper equivalent pounds (000's) ⁽¹⁾	5,426	4,677	16%	21,323	18,338	16%

(1) Silver equivalent ounces and copper and zinc equivalent pounds for Q4 2018 were calculated using the following realized prices: \$14.63/oz Ag, \$2.77/lb Cu, \$0.89/lb Pb, \$1.16/lb Zn, \$1,238/oz Au. Silver equivalent ounces and copper and zinc equivalent pounds for Q4 2017 were calculated using the following realized prices: \$16.77/oz Ag, \$3.13/lb Cu, \$1.11/lb Pb, \$1.45/lb Zn, \$1,282/oz Au. Silver equivalent ounces and copper and zinc equivalent pounds for 12M 2018 were calculated using the following realized prices: \$15.65/oz Ag, \$2.96/lb Cu, \$1.02/lb Pb, \$1.31/lb Zn, \$1,269/oz Au. Silver equivalent ounces and copper and zinc equivalent pounds for 12M 2017 were calculated using the following realized prices: \$17.14/oz Ag, \$2.82/lb Cu, \$1.06/lb Pb, \$1.32/lb Zn, \$1,265/oz Au.

Cusi Mine, Mexico

Annual production at the Cusi Mine was 186,889 tonnes in 2018, which was 112% higher than 2017. Total ore processed increased 258% to 58,289 tonnes during Q4 2018 compared to Q4 2017. The higher throughput was partially offset by lower head grades and recoveries for all metals, but still resulted in a 70% increase in silver equivalent production in Q4 2018 compared to Q4 2017.

Silver equivalent production increased 48% during 2018 compared to 2017, as silver production increased 108% to 700,000 ounces, while gold production decreased 12% to 372 ounces, lead production decreased 33% to 1,194,000 pounds and zinc production decreased 92% to 71,000 pounds. However, during Q4 2018, silver, gold, and lead production were 107%, 62%, and 38% higher than Q4 2017, respectively.

The increase in throughput was partially the result of the Company's successful development and mining of

ore from the recently discovered high-grade silver stockwork zone located within the Santa Rosa de Lima ("SRL") vein complex. This mineralized zone extends to over 100 meters in length, 40 meters in width and 70 meters in height. Our development plan is now incorporating the wider dimensions of this zone.

A summary of production for the Cusi Mine for Q4 2018 has been provided below:

Cusi Production	3 Months Ended			12 Months Ended		
	Q4 2018	Q4 2017	% Var	Q4 2018	Q4 2017	% Var
Tonnes processed (mt)	58,289	16,280	258%	186,889	88,011	112%

Zinc pounds (000's)	0	152	-100%	71	937	-92%
Silver equivalent ounces (000's) ⁽¹⁾	207	122	70%	813	550	48%

(1) Silver equivalent ounces and copper and zinc equivalent pounds for Q4 2018 were calculated using the following realized prices: \$14.63/oz Ag, \$2.77/lb Cu, \$0.89/lb Pb, \$1.16/lb Zn, \$1,238/oz Au. Silver equivalent ounces and copper and zinc equivalent pounds for Q4 2017 were calculated using the following realized prices: \$16.77/oz Ag, \$3.13/lb Cu, \$1.11/lb Pb, \$1.45/lb Zn, \$1,282/oz Au. Silver equivalent ounces and copper and zinc equivalent pounds for 12M 2018 were calculated using the following realized prices: \$15.65/oz Ag, \$2.96/lb Cu, \$1.02/lb Pb, \$1.31/lb Zn, \$1,269/oz Au. Silver equivalent ounces and copper and zinc equivalent pounds for 12M 2017 were calculated using the following realized prices: \$17.14/oz Ag, \$2.82/lb Cu, \$1.06/lb Pb, \$1.32/lb Zn, \$1,265/oz Au.

2019 Production Guidance

The Company anticipates that 2019 silver equivalent production will range between 19.5 to 21.8 million ounces, copper equivalent production will range between 107.0 to 119.9 million pounds, and zinc equivalent production will range between 261.5 to 292.9 million pounds. The increase in 2019 guidance for silver ounces and copper pounds compared to the actual 2018 production is due to the significant throughput and recovery increases planned at Bolivar and Cusi. At Yauricocha, higher copper production should be realized due to consistent copper head grades and improvement to recoveries expected from the various areas planned to be mined from the copper areas in the Esperanza Zone during 2019.

A table summarizing 2019 production guidance has been provided below:

	2019 Guidance		2018 Actual
	Low	High	
Silver ounces (000's)	3,730	4,176	2,716
Copper pounds (000's)	45,000	50,400	33,968
Lead pounds (000's)	25,500	28,600	27,714
Zinc pounds (000's)	72,400	81,100	76,831
Gold ounces	8,100	9,000	7,743
Silver equivalent ounces (000's) ⁽¹⁾	19,478	21,812	17,988
Copper equivalent pounds (000's) ⁽¹⁾	107,035	119,858	95,184
Zinc equivalent pounds (000's) ⁽¹⁾	261,545	292,880	215,053

(1) 2019 Silver equivalent ounces, copper and zinc equivalent pounds were calculated using the following metal prices: \$16.65/oz Ag, \$3.03/lb Cu, \$1.01/lb Pb, \$1.24/lb Zn, \$1,275/oz Au

About Sierra Metals

[Sierra Metals Inc.](#) is Canadian based growing polymetallic mining company with production from its Yauricocha Mine in Peru, and its Bolivar and Cusi Mines in Mexico. The Company is focused on increasing

production volume and growing mineral resources. Sierra Metals has recently had several new key discoveries and still has many more exciting brownfield exploration opportunities at all three Mines in Peru and Mexico that are within close proximity to the existing mines. Additionally, the Company also has large land packages at all three mines with several prospective regional targets providing longer-term exploration upside and mineral resource growth potential.

The Company's Common Shares trade on the Bolsa de Valores de Lima and on the Toronto Stock Exchange under the symbol "SMT" and on the NYSE American Exchange under the symbol "SMTS".

Forward-Looking Statements

This press release contains "forward-looking information" and "forward-looking statements" within the meaning of Canadian and U.S. securities laws related to the Company (collectively, "forward-looking information"). Forward-looking information includes, but is not limited to, statements with respect to the Company's operations, including anticipated developments in the Company's operations in future periods, the Company's planned exploration activities, the adequacy of the Company's financial resources, and other events or conditions that may occur in the future. Statements concerning mineral reserve and resource estimates may also be considered to constitute forward-looking statements to the extent that they involve estimates of the mineralization that will be encountered if and when the properties are developed or further developed. These statements relate to analyses and other information that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects", "anticipates", "plans", "projects", "estimates", "assumes", "intends", "strategy", "goals", "objectives", "potential" or variations thereof, or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved, or the negative of any of these terms and similar expressions) are not statements of historical fact and may be forward-looking information.

Forward-looking information is subject to a variety of risks and uncertainties, which could cause actual events or results to differ from those reflected in the forward-looking information, including, without limitation, risks inherent in the mining industry including environmental hazards, industrial accidents, unusual or unexpected geological formations, floods, labour disruptions, explosions, cave-ins, weather conditions and criminal activity; commodity price fluctuations; higher operating and/or capital costs; lack of available infrastructure; the possibility that future exploration, development or mining results will not be consistent with the Company's expectations; risks associated with the estimation of mineral resources and the geology, grade and continuity of mineral deposits and the inability to replace reserves; fluctuations in the price of commodities used in the Company's operations; risks related to foreign operations; changes in laws or policies, foreign taxation, delays or the inability to obtain necessary governmental permits; risks relating to outstanding borrowings; issues regarding title to the Company's properties; risks related to environmental regulation; litigation risks; risks related to uninsured hazards; the impact of competition; volatility in the price of the Company's securities; global financial risks; inability to attract or retain qualified employees; potential conflicts of interest; risks related to a controlling group of shareholders; dependence on third parties; differences in U.S. and Canadian reporting of mineral reserves and resources; potential dilutive transactions; foreign currency risks; risks related to business cycles; liquidity risks; reliance on internal control systems; credit risks, including risks related to the Company's compliance with covenants with respect to its BCP Facility; uncertainty of production and cost estimates for the Yauricocha Mine, the Bolivar Mine and the Cusi Mine; and other risks identified in the Company's filings with Canadian securities regulators and the U.S. Securities and Exchange Commission, which filings are available at www.sedar.com and www.sec.gov, respectively.

This list is not exhaustive of the factors that may affect any of the Company's forward-looking information. Forward looking information includes statements about the future and are inherently uncertain, and the Company's actual achievements or other future events or conditions may differ materially from those reflected in the forward-looking information due to a variety of risks, uncertainties and other factors. The Company's statements containing forward-looking information are based on the beliefs, expectations and opinions of management on the date the statements are made, and the Company does not assume any

obligation to update forward-looking information if circumstances or management's beliefs, expectations or opinions should change, other than as required by applicable law. For the reasons set forth above, one should not place undue reliance on forward-looking information.

Note Regarding Reserve and Resource Estimates

All reserve and resource estimates reported by the Company were calculated in accordance with the Canadian National Instrument 43-101 and the Canadian Institute of Mining and Metallurgy Classification system. These standards differ significantly from the requirements of the U.S. Securities and Exchange Commission ("SEC"). The differences between these standards are discussed in our SEC filings. Mineral resources which are not mineral reserves do not have demonstrated economic viability.
