

Avino Announces Q1 2019 Production Results

15.04.2019 | [CNW](#)

VANCOUVER, April 15, 2019 - Avino Silver & Gold Mines Ltd. (ASM: TSX/NYSE American, GV6: FSE, "Avino" or "the Company") is pleased to announce its first quarter 2019 production results from its Avino property near Durango, Mexico.

The silver equivalent production in Q1, 2019 decreased by 6% compared to Q1, 2018, primarily due to a shutdown of the mill for a period of 7 days during the quarter to facilitate planned upgrades to the crushing circuit.

Consolidated Production Highlights for Q1 2019 (Compared to Q1 2018)

- Silver equivalent production decreased by 6% to 615,019 oz*
- Gold production decreased by 6% to 1,813 oz
- Silver production decreased by 13% to 268,399 oz
- Copper production increased by 10% to 1,062,702 lbs

*In Q1, 2019, AgEq was calculated using metals prices of \$15.57 oz Ag, \$1304.40 oz Au and \$2.82lb Cu. In Q1, 2018, AgEq was calculated using metals prices of \$16.77 oz Ag, \$1,330 oz Au and \$3.16 lb Cu.

"The production results this quarter are reflective of the lower grades achieved, coupled with 7 days of lost production while mill upgrades to the crusher were being completed at the mill. The upgrades were significant to the overall operation as they will enable us to realize more consistent throughput from the crusher during the rainy season in Mexico." said David Wolfinger, President and CEO. "We continue to focus on profitable ounces and a considered approach to keeping costs controlled company, particularly as we are experiencing lower metal prices."

Although recovery numbers look less favorable; due to the negligible cost of mining, the profit margin on this material is quite positive. We will continue to evaluate our feed and product mix to maximize profitability during the current metal price environment.

Quality Assurance/Quality Control

Mill assays are performed at the Avino property's on-site lab. Check samples are sent to SGS Labs in Durango, Mexico for verification. All concentrate shipments are assayed by one of the following independent third party labs: AHK, and Inspectorate in the UK and LSI in the Netherlands.
