

Bravada Gold Corporation Closes First Tranche of Non-Brokered Private Placement

13.05.2019 | [Newsfile](#)

Vancouver, May 13, 2019 - [Bravada Gold Corp.](#) (TSXV: BVA) (OTCQB: BGAVF) (FSE: BRTN) (the "Company" or "Bravada") announces that the Company has closed the first tranche of its previously reported non-brokered private placement by issuing 8,105,000 units at a price of \$0.07 per unit for gross proceeds of \$567,350. Each unit consists of one common share and one share purchase warrant exercisable to purchase one additional common share for a period of four years at an exercise price of \$0.12 per share. Securities issued pursuant to this tranche of the private placement, including common shares and share purchase warrants carry a legend restricting trading of the securities until September 14, 2019. Finders' fees and commissions may be paid by the Company in relation to the units sold in this Offering.

Net proceeds from the private placement will be used for exploration costs of, in order of priority, 1) an initial drilling program on the SF property, 2) geophysical testing at Wind Mountain, 3) property maintenance fees, permitting fees and associated ancillary costs, and 4) certain accounts payable and working capital.

President Joe Kizis commented, "Closing this first tranche now allows Bravada to post our permit bond, purchase drill supplies, and construct drill sites for our upcoming program at SF. A reverse-circulation drill rig is scheduled to arrive in late June. SF is a Carlin-type exploration property located approximately 6km east of the large and high-grade Goldrush deposit, which is being developed by Barrick. The host rocks and structural setting at SF are similar to Goldrush. We expect the final tranche to close soon."

About Bravada

Bravada is an exploration company with a portfolio of high-quality properties in Nevada, one of the best mining jurisdictions in the world. The Company has successfully identified and advanced properties that have the potential to host high-margin deposits while successfully attracting partners to fund later stages of project development. With the addition of OceanaGold's option of Highland, four of Bravada's eleven Nevada properties are being funded by partners. As well, there are no NSR-type royalties to vendors that cannot be reduced. Bravada's value is underpinned by a substantial gold and silver resource with a positive PEA at Wind Mountain and the Company has significant upside potential from possible new discoveries at its exploration properties, most of which host encouraging drill intercepts of gold and which already have drill targets developed by the Company.
