

Silver Grail Resources Ltd.: New Mineralized Structure Found on Fiji Property

19.08.2019 | [The Newswire](#)

Vancouver, August 19, 2019 - [Silver Grail Resources Ltd.](#) ("Silver Grail") (TSXV:SVG) (OTC:SVGAF) is pleased to report the discovery of a new mineralized structure on its Fiji property located in the Golden Triangle region of north-western British Columbia.

A recently completed helicopter survey of the northern part of the Fiji property has disclosed a mineralized structure which can be followed uphill for at least 300m before disappearing under a blanket of snow and ice (<http://teuton.com/fijivideo>). This new zone was not previously observed and appears to have been exposed by retreating icefields. Samples have been taken and sent for assay.

Permitting for the Fiji project is in place. If results of the sampling are positive and weather conditions allow, the property will be drilled this year.

Silver Grail owns the Fiji property jointly with Teuton Resources Corp. The property abuts to the west and northwest of Auryn's Homestake gold-silver property and is about 28 km southeast of the deepwater port of Stewart, BC. Prospecting by Silver Grail-Teuton personnel in 2006 identified two promising zones of high-grade, gold-bearing mineralization in an area lying just west of the common border with the Homestake Ridge property.

The Qualified Person for this news release is Dino Cremonese, P.Eng., who as President of Silver Grail is not independent of the Company.

About Silver Grail

Silver Grail owns interests in 12 separate silver-gold properties in the Stewart region in the southern section of the Golden Triangle as well as three cobalt prospects located elsewhere in British Columbia.

Respectfully:

"Dino Cremonese, P.Eng."

President, [Silver Grail Resources Ltd.](#)
