

# Giyani Starts the Tendering Process for Reclamation Work at its Manganese Deposits in Botswana

11.09.2019 | [GlobeNewswire](#)

OAKVILLE, Sept. 11, 2019 - [Giyani Metals Corp.](#) (TSXV:EMM) (FRANKFURT:KT9) (WKN:A2DUU8) (&ldquo;Giyani&rdquo; or the &ldquo;Company&rdquo;) announces the commencement of the tendering process to choose a professional mining contracting company for the reclamation work at its K.Hill and Otse manganese deposits in Botswana.

Subsequent to the final approval of the Company&rsquo;s environmental management plans (&ldquo;EMP&rdquo;) for K.Hill and Otse, by the Department of Environmental Affairs in Botswana, Giyani identified six professional mining and mineral processing contractors as potential candidates for the reclamation and processing work at both sites. An official request for proposal (&ldquo;RFP&rdquo;) was sent to the six companies on August 5, 2019 and five preliminary responses were received on August 21, 2019; one company decided not to bid for the project. A one-day site visit to both K.Hill and Otse was organized for each of the five interested companies during the last week of August. The Company expects final proposals to be completed by the end of September 2019.

Robin Birchall, CEO of Giyani commented:

*&ldquo;We are very pleased with the progress and thoroughness of this tendering process. The five mining contractors have very good track records in Botswana, South Africa and neighbouring countries in the region. They have the right capabilities and skill sets that are needed for this project. We look forward to the completion of this tendering process and to start the work on the ground in the near future.&rdquo;*

#### Forward Looking Information

This press release contains "forward-looking information" within the meaning of applicable Canadian securities legislation. All statements in this news release, other than statements of historical fact, that address events or developments that Giyani expects to occur, are "forward-looking statements". Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "does not expect", "plans", "anticipates", "does not anticipate", "believes", "intends", "estimates", "projects", "potential", "scheduled", "forecast", "budget" and similar expressions, or that events or conditions "will", "would", "may", "could", "should" or "might" occur. Specific forward-looking statements and forward-looking information herein includes statements regarding the size of and completion of the private placement and the intended use of the net proceeds from the financing.

All such forward-looking statements are based on the opinions and estimates of the relevant management as of the date such statements are made and are subject to certain assumptions, important risk factors and uncertainties, many of which are beyond Giyani's ability to control or predict. Forward-looking statements are necessarily based on estimates and assumptions that are inherently subject to known and unknown risks, uncertainties and other factors that may cause actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking statements. In the case of Giyani, these facts include their anticipated operations in future periods, planned exploration and development of its properties, and plans related to its business and other matters that may occur in the future. This information relates to analyses and other information that is based on expectations of future performance and planned work programs.

Forward-looking information is subject to a variety of known and unknown risks, uncertainties and other factors which could cause actual events or results to differ from those expressed or implied by the forward-looking information, including, without limitation: inherent exploration hazards and risks; risks related to exploration and development of natural resource properties; uncertainty in Giyani's ability to obtain funding; commodity price fluctuations; recent market events and conditions; risks related to the uncertainty of mineral resource calculations and the inclusion of inferred mineral resources in economic estimation; risks related to governmental regulations; risks related to obtaining necessary licenses and permits; risks related to their business being subject to environmental laws and regulations; risks related to their mineral properties being subject to prior unregistered agreements, transfers, or claims and other defects in title; risks relating to competition from larger companies with greater financial and technical resources; risks relating to the inability to meet financial obligations under agreements to which they are a party; ability to recruit and retain qualified personnel; and risks related to their directors and officers becoming associated with other natural resource companies which may give rise to conflicts of interests. This list is not exhaustive of the factors that may affect Giyani's forward-looking information. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in the forward-looking information or statements.

Giyani's forward-looking information is based on the reasonable beliefs, expectations and opinions of their respective management on the date the statements are made, and Giyani does not assume any

obligation to update forward looking information if circumstances or management's beliefs, expectations or opinions change, except as required by law. For the reasons set forth above, investors should not place undue reliance on forward-looking information.
