## About Rockcliff Metals Corporation

Rockcliff is a well-funded Canadian resource development and exploration company with approximately \$25.9 million in cash, a fully functional +1000 tpd permitted leased processing and tailings facility as well as several advanced stage, high-grade copper and zinc dominant VMS deposits in the Snow Lake area of Manitoba. The Company is continuing the permitting process for its 100% owned Tower copper project which it expects to be completed by Q4 of this year. The permit process being undertaken by the Company would allow the Company to develop the property using ramp access and allow the Company to extract a bulk sample for test purposes. The Company is a major landholder in the Flin Flon-Snow Lake greenstone belt which is home to the largest Paleoproterozoic VMS district in the world hosting mines and deposits containing copper, zinc, gold and silver. The Company's extensive portfolio of properties totals over 4,200 square kilometres and includes eight of the highest-grade, undeveloped VMS deposits and five lode-gold properties held by Goldpath Resources Corp., a Rockcliff wholly-owned subsidiary, including the historic Rex-Laguna gold mine, Manitoba's first and highest-grade gold mine.
