

White Rock Minerals Ltd: Quarterly Activities Report

27.07.2020 | [ABN Newswire](#)

Ballarat, Australia - [White Rock Minerals Ltd.](#)'s (ASX:WRM) Exploration activities during the Quarter at the Company's 100% owned Last Chance gold target, located in the Tintina Gold Province of central Alaska, has yielded highly encouraging results:-

- A sample of 77.5g/t gold and another of 4,580g/t (147 ozs/t) silver in rock chips.
- Up to 7.1g/t gold in soil samples.
- Gold-arsenic-antimony anomalism defined by systematic soil sampling has revealed an enormous system extending for over 6km strike east-west and up to 1.2km wide
- A first phase diamond drilling program is scheduled to commence prior to 1 August, 2020. The first drill holes will target the broadest and most developed zones of gold and pathfinder geochemical anomalism with the aim of testing the high grade clusters and developing a better understanding of the lithologic and structural controls of the hydrothermal system.
- The Tintina Gold Province is host to giant gold deposits including Donlin Creek (45 Moz Au), Pogo (10 Moz Au) and Fort Knox (13.5 Moz Au).
- During the Quarter, White Rock moved to secure a strategic regional tenement position surrounding the Company's Last Chance Gold Target including readily apparent strike extensions of the gold system. An additional 375 mining claims covering 240km² (93 square miles) were staked. White Rock's Red Mountain project now comprises 1,298 mining claims over 798km² (308 square miles).
- Dr. Quinton Hennigh was appointed as Technical Advisor to assist with the Company's exploration program in Alaska and its investor relations presence in North America.
- Completion of a \$15.85 million capital raise subsequent to the end of the Quarter sees the Company well-funded to pursue a successful discovery.
