

Quantum Battery Metals Work Program Update

26.05.2021 | [Newsfile](#)

Vancouver, May 26, 2021 - [Quantum Battery Metals Corp.](#) (CSE: QBAT) (OTC Pink: BRVVF) (FSE: 23B) ("Quantum" or the "Company") is pleased to announce the completion of a satellite survey over its Alba and Kelso lithium properties. The satellite survey has identified several anomalous areas which will be further investigated over the course of subsequent field work. "We are pleased with the timing of the satellite survey. With several structures and areas of anomalous response similar to what is observed at the rose project, which is 10km South from the Kelso and Alanel property having been identified for further investigation, it adds to our belief in the potential of substantial battery metals located on these properties. The properties are located near existing infrastructure and ground that has been proven up, we look to further explore and identify the underlying resource," states CEO Andrew Sostad.

Awaiting the final results of the satellite survey, the Company has noted that several areas are road accessible, and close to already existing infrastructures. The Alba and Kelso properties are road accessible approximately 59km north of Nemaska and 441km northeast of Matagami. Two high voltage transmission lines pass within 10km of the project area. The Company has determined that these areas would be a key focus for their mining program and would further advance building their mining portfolio.

Forward-Looking Information This news release includes certain statements that may be deemed "forward-looking statements". All statements in this release, other than statements of historical facts, that address events or developments that [Quantum Battery Metals Corp.](#) (the "Company") expects to occur, are forward-looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in the forward-looking statements. Factors that could cause the actual results to differ materially from those in forward-looking statements include market prices, exploitation and exploration successes, and continued availability of capital and financing, and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. Forward-looking statements are based on the beliefs, estimates and opinions of the Company's management on the date the statements are made. Except as required by applicable securities laws, the Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change.
