

# ArcPacific Resources Significantly Increases Potential of LMSL Copper, Silver, Gold Project with Acquisition

21.03.2022 | [GlobeNewswire](#)

NEW YORK, March 21, 2022 - [ArcPacific Resources Corp.](#) (TSXV: ACP) (OTC: ACPRF) recently announced an acquisition of the Rey Lake Property immediately adjacent to the northeast of its established LMSL copper, silver, and gold Project in British Columbia, Canada. The acquisition broadens ArcPacific's footprint in a copper mining hotbed. According to Adrian Smith, the Chief Executive Officer (CEO) of ArcPacific, the decision to acquire the adjacent claims around its LMSL Project was an extremely easy one to make given it will significantly increase the potential of the entire project.

And it's easy to understand his thinking. After all, the highly prospective property is ideally situated in the center of British Columbia's Nicola Mining Division, an area prominently known for its copper endowment, and the property hosts impressive historical estimates with an approximate total of 74-million tonnes with historically reported copper grades averaging 0.23% copper equivalent.

Adrian Smith said of the company's expanded footprint on the Rey Lake Property, "Having the good fortune to already hold a 100% interest in a large land package within this district is extremely exciting when looking at the amount of work that has been previously completed to de-risk the future exploration on additional highly prospective copper, gold, silver, and molly (molybdenite) targets.

"And, as a result of being centrally located in a historic mining district, all the new ground acquired can be considered highly prospective, exemplified by the newly acquired and immediately adjacent Rey Lake Property, which is host to a significant historical resource (historic estimate)."

Opportunity and location are in ArcPacific's favor.

First, the opportunity. ArcPacific has increased the total footprint of its LMSL Project to 14,600 hectares or more than 145 square kilometers with the acquisition of adjacent claims on the Rey Lake Property combined with additional staking to expand its copper, silver and gold project. With world events constantly in flux, there is no better time to be mining for precious metals. As prices soar, those companies in the industry with significant footprints in widely known highly prospective regions, should see added value.

The company believes that the copper mineralization that exists on the Rey Lake Property could be related to a possible faulted offset of the same intrusive suite present within the Lucky Mike area of its own LMSL Project. Additionally, ArcPacific says the expanded land package on its LMSL Project covers new areas of anomalous copper in soil geochemistry with selective historical rock samples grading up to 0.4% Cu in volcanic breccias located along the northeast trending structural zones spanning several kilometers from the Lucky Mike area.

ArcPacific's CEO says he fully understands the long-term economics of copper and other precious metals in a rapidly evolving and tightening landscape, "It can be said that historic resources gradually become more valuable and economically viable with time. What we have acquired at the Rey Lake Property is a good example of this. Historically, copper deposits needed to be at surface and of sufficient grade to support the metal prices and costs tied to mining at that time. Thus, the historic exploration only tested at shallow depths and dismissed lower grades as being, then, uneconomic.

"The end result for ArcPacific is the acquisition of a confirmed porphyry copper system with remaining upside to increase the overall tonnages and grades by exploring the system at greater depths and following it along strike. Ultimately, this will add to the overall global resources we anticipate defining on the project while we

continue to explore many additional high-priority target areas that together can make this project something special."

Location is key in the mining industry. Successful neighbors are certainly a welcomed sign that the geology in the area favors success for others as well, so being situated right in the middle of a mining hotbed, surrounded by a host of other companies that are also seeing success bodes well for ArcPacific's future.

ArcPacific is certainly in good company in the Nicola Mining District surrounded by several mining operations and new discoveries, including the Highland Valley Mine, owned by Teck Resources, the largest copper mine in Canada, the MDP Project owned by Kodiak Copper, a new discovery, the New Afton Project owned by New Gold, which is a high-grade copper-gold alkali porphyry deposit, and the Shovelnose Gold Property owned and operated by Westhaven Gold Corp.

Adrian Smith, when discussing why the Rey Lake Property acquisition is significant to the company's investors, stated, "When looking at the merits of a project, the jurisdiction is an important factor, and it is true that 'close-ology' is not always a viable way to determine prospectively, but it holds true that if a region is host to one or more significant mines/deposits, then it is often host to many. It is also true that porphyry deposits often occur in clusters. Investors can be assured that we have now acquired a known porphyry occurrence in a region where there are many, and we have scientific evidence that suggests there may be more, yet to be defined, but falling within the now expanded LMSL Project that is 100% held by ArcPacific."

Now, ArcPacific has even more to plan for in its upcoming drill season, and that is a good problem to have. This season, the company will be busy drilling in order to verify and expand upon the historic estimates of the Rey Lake Property. The company says that it anticipates the additional drilling should extend the porphyry mineralization to greater depths and expand the areas of mineralization outside of the previously identified areas. The fact that the LMSL Project was already host to several historic mines and highly prospective target areas, which could be related to one larger system, is significant and investors can look forward to drilling results and further work that is planned to take place at many of these locations this drill season.

#### About ArcPacific Resources

[ArcPacific Resources Corp.](#) is a Canadian-based exploration company. ArcPacific owns 100% interest in the LMSL Copper Gold & Silver Project in British Columbia, Canada, in the prolific Quesnel Terrane, which is world renowned for its copper and gold endowment. The Company also holds other highly prospective exploration projects in Canada including its Blackdome gold project where it discovered continuous gold mineralization in 2021 by completing the first ever trenching at the project. The Company is focused on creating shareholder value through new discoveries and strategic development of its mineral properties and is exploring additional business opportunities.

#### About Stock Market Media Group

Stock Market Media Group is a news and media content development IR/PR firm offering a platform for corporate stories to unfold in the media with press releases, research reports, corporate videos, radio-style CEO interviews, and feature news articles. Your story, our words!

This article was written based on publicly available information. Stock Market Media Group may, from time to time, include our own opinions about the companies, their business, markets and opportunities in our articles. Any opinions we may offer about any of the companies we write about are solely our own and are made in reliance upon our rights under the First Amendment to the U.S. Constitution and are provided solely for the general opinionated discussion of our readers. Our opinions should not be considered to be complete, precise, accurate, or current investment advice, or construed or interpreted as research. Any investment decisions you may make concerning any of the securities we write about are solely your responsibility based on your own due diligence. Our publications are provided only as an informational aid, and as a starting point for doing additional independent research. We encourage you to invest carefully and read the investor information available at the web site of the U.S. Securities and Exchange Commission at [www.sec.gov](http://www.sec.gov), where you can also find [ArcPacific Resources Corp.](#)'s filings and disclosures. We also recommend, as a

general rule, that before investing in any securities, you consult with a professional financial planner or advisor, and you should conduct a complete and independent investigation before investing in any security after prudent consideration of all pertinent risks. We are not a registered broker, dealer, analyst, or advisor. We hold no investment licenses and may not sell, offer to sell, or offer to buy any security. Our publications about ArcPacific Resources are not a recommendation to buy or sell a security.

Should Stock Market Media Group and its management own shares in the profiled company, they may benefit from any increase in the share price of the profiled companies and hold the right to sell the shares bought at any given time including shortly after the release of the company's profile. Section 17(b) of the 1933 Securities and Exchange Act requires publishers who distribute information about publicly traded securities for compensation, to disclose who paid them, the amount, and the type of payment. Under the Securities Act of 1933, Section 17(b), Stock Market Media Group discloses that it was remunerated one-thousand, three hundred dollars paid for by a third party via bank wire, to produce this content related to ArcPacific Resources.

Stock Market Media Group and its management do not own any shares in ArcPacific Resources and never accepts compensation in free-trading shares for its marketing services of the company being profiled, however third parties that have compensated Stock Market Media Group may hold free-trading shares of the company being profiled and could very well be selling, holding or buying shares of the company's stock at the same time the content is being disseminated to potential investors; this should be viewed as a definite conflict of interest and as such, the reader should take this into consideration.

If Stock Market Media Group ever accepts compensation in the form of free trading shares of the company being profiled and decides to sell these shares into the public market at any time before, during, or after the release of the company's profile, our disclaimer will be updated accordingly to reflect the current position of any free trading shares received as compensation for our services.
