About CVW CleanTech

CVW CleanTech, formerly Titanium Corporation, has developed Creating Value from Waste (CVW's) technologies to remediate oil sands mining tailings stream. The Company's CVW's technology provides sustainable solutions to reduce the environmental footprint of the oil sands industry. Our technology reduces the environmental impact of oil sands froth treatment tailings while economically recovering valuable products that would otherwise be lost. CVW's recovers bitumen, solvents, heavy minerals and water from tailings, preventing these commodities from entering tailings ponds and the atmosphere: volatile organic compound and greenhouse gas emissions are materially reduced; hot tailings water is improved in quality for recycling; and residual tailings can be thickened more readily. A new minerals industry will be created commencing with the production and export of zircon and other titanium-based minerals. The Company's shares trade on the TSX-V under the symbol "CVW".
