

# Eagle Plains Resources / Rex Resources Announce 2022 Field Program at the Kalum Gold Property, Golden Triangle Region

18.07.2022 | [ACCESS Newswire](#)

CRANBROOK, July 18, 2022 - Eagle Plains Resources (TSX-V:EPL), ("EPL") has been notified by option partner Rex Resources Corp. (TSX-V:OWN), ("Rex") that field crews have been mobilized to Eagle Plains' 100% owned Kalum Property located approximately 35 km northwest of Terrace, British Columbia in the Skeena Mining Division. Under the terms of the option agreement, Rex can earn an undivided 60% interest in the property by completing exploration expenditures of \$3,000,000, making cash payments of \$500,000 and issuing 1,000,000 common shares to EPL over a four year period.

2022 fieldwork will be carried out by TerraLogic Exploration Services of Cranbrook BC and is planned to include:

- detailed mapping to locate drill collars in the Bling-Rico and Babit trend areas
- structural mapping in the Hat Zone area
- prospecting and mapping of sheeted Au-Ag veins in the Tojo area
- detailed mapping to locate drill collars in the Martin area
- reconnaissance prospecting and mapping in underexplored areas of the property

## Property Geology

The 2,871 ha property is flanked by a large intrusive stock that has intruded sedimentary rocks of the Bowser Lake Group. A number of high grade, vein-type gold and silver occurrences are associated with the contact zone of the intrusive stock.

## Property History

Eagle Plains acquired the property in 2003 and completed significant exploration programs in 2003 and 2004. The programs included a VTEM airborne survey, extensive geochemical programs, geologic mapping, and a 19-hole diamond drill program. The best drill results from this work included drill-hole KRC04001, drilled at the Rico showing (discovered by Eagle Plains), which returned 35g/t Au over 2.5m from 101.8m to 104.3m; including a 0.5m interval that assayed 107g/t Au. Historical sampling at the Chris occurrence reported a grab sample of 158 g/t Au and 5,536 g/t Ag. At the Martin showing area, sampling by Eagle Plains in 2004 returned 34.0 g/t Au and 83.0 g/t Ag from a grab sample of sulphide bearing quartz vein material. The Martin area has never been drill tested. Management cautions that rock grab samples are selective samples by nature and as such are not necessarily representative of the mineralization hosted across the property.

The property area has seen exploration activity by various operators over the years, with the most recent diamond drilling carried out in 2012 by Clemson Resources, who drilled a single hole to test for high-grade mineralization in an area outside of present claim boundaries. 2020 work by Eagle Plains included high resolution orthophoto and LIDAR surveys.

All work to date continues to support the interpreted potential for the Kalum Property to host both high grade gold-silver deposits and lower-grade bulk-tonnage type gold mineralization.

Charles C. Downie, P.Geo., a "qualified person" for the purposes of National Instrument 43-101 - Standards of Disclosure for Mineral Projects and a director of Eagle Plains, has prepared, reviewed, and approved the scientific and technical disclosure in the news release.

## About Eagle Plains Resources

Based in Cranbrook, B.C., Eagle Plains is a well-funded, prolific project generator that continues to conduct research, acquire and explore mineral projects throughout western Canada. The Company was formed in 1992 and is the ninth-oldest listed issuer on the TSX-V (and one of only three that has not seen a roll-back or restructuring of its shares). Eagle Plains has continued to deliver shareholder value over the years and through numerous spin-outs has transferred over \$100,000,000 in value directly to its shareholders, with Copper Canyon Resources and recently Taiga Gold being notable examples.

The Company is committed to steadily enhancing shareholder value by advancing our diverse portfolio of projects toward discovery through collaborative partnerships and development of a highly experienced technical team. Eagle Plains also holds significant royalty interests in western Canadian projects, covering a broad spectrum of commodities on projects controlled by [Cameco Corp.](#), Iso Energy Corp., [Denison Mines Corp.](#), [Skeena Resources Ltd.](#) and [Alexco Resource Corp.](#)/Banyan Gold Corp., among others. Management's focus is to advance its most promising exploration projects. Throughout the exploration process, our mission is to help maintain prosperous communities by exploring for and discovering resource opportunities while building lasting relationships through honest and respectful business practices.

Expenditures from 2011-2021 on Eagle Plains-related projects exceed \$27M, the majority of which was funded by third-party partners. This exploration work resulted in approximately 42,000m of diamond-drilling and extensive ground-based exploration work facilitating the advancement of numerous projects at various stages of development

On behalf of the Board of Directors  
"Tim J. Termuende"

President and CEO
