31.08.2022 | [Newsfile](#)

Vancouver, August 31, 2022 - [World Copper Ltd.](#) (TSXV: WCU) (OTCQX: WCUFF) (FSE: 7LY0) ("World Copper" or the "Company") reports that, pursuant to their news releases dated July 21, 2022 and June 29, 2022, the Company has closed the final tranche of the Placement. On August 31, 2022 the Company issued 5,276,501 Units for gross proceeds of \$1,582,950.30. Each unit consists of one common share (a "Share") and one-half of one common share purchase warrant (a "Warrant"). Each whole Warrant entitles the holder to acquire one additional share of the Company for a period of two years from the date of issuance at a price of \$0.60 per share. The expiry of the Warrants may be accelerated if the closing price of the Company's common shares on the TSX Venture Exchange ("TSXV") is equal to or greater than \$1.00 for a minimum of twenty consecutive trading days and a notice of acceleration is provided in accordance with the terms of the Warrants.

An aggregate total of 9,540,915 units were issued for aggregate gross proceeds of \$2,862,274.50.

Finder's fees of 7% cash and 7% finder's warrants were paid to BT Global Growth Inc. (\$7,014.00 and 23,380 warrants), Gerhard Merkel (\$7,483.01 and 24,943 warrants), Leede Jones Gable Inc. (\$12,495.00 and 41,650 warrants), Canaccord Genuity Corp. (\$18,301.50 and 61,005 warrants), Integral Wealth Securities Limited (\$1,050.00 and 3,500 warrants), Echelon Wealth Partners (\$8,890.01 and 29,633 warrants) and, Haywood Securities Inc. (\$3,219.99 and 10,733 warrants). All warrants issued as finder's fees have an exercise price of \$0.30, are non-transferable and expire 3 years from closing.

All securities issued in the Offering have a four-month plus one day hold period, during which time the securities may not be traded. Closing of the Offering is subject to the final acceptance of the TSXV.

The net proceeds from the Offering are intended for exploration and development of the Company's Escalones and Zonia assets, and general working capital.

ABOUT WORLD COPPER LTD.

[World Copper Ltd.](#), headquartered in Vancouver, BC, is a Canadian resource company focused on the exploration and development of its advanced (PEA Stage) copper porphyry projects: Escalones in Chile, and Zonia in Arizona. These projects have estimated resources with significant soluble copper (potentially heap leach amenable) mineralization. In addition, each project has peripheral copper porphyry exploration targets with exciting potential to expand the established resources. World Copper is an aggressive junior resource company focused on advancing mining and exploration projects and controls significant copper oxide resources in proven mining jurisdictions.

The World Copper team has a unique skill in navigating the mining sector within Chile, with some members having worked in the country for more than 40 years and with discovery success.

About Escalones

The Escalones porphyry-skarn copper-gold project has estimated inferred resources of 426 million tonnes of 0.367% total copper within the oxidized zone, based on nearly 25,000m of drill core from 53 holes. The 3.45 billion pounds of copper should be amenable to heap leaching with an average recovery of 71%. The Company is focused on exploring the Mancha Amarilla target immediately to the south of the existing resource. In addition, three significant hydrothermal alteration zones, each measuring between 2,000m and 3,000m in diameter, lie 8-10km to the north of the main discovery.

Mineral resources are not mineral reserves and do not have demonstrated economic viability as there is no certainty that all or any part of the resources will be converted into reserves. Inferred resources are that part of a mineral resource for which quantity and grade or quality are estimated on the basis of limited geological evidence and sampling. It is reasonably expected that the inferred resources could be upgraded to indicated resources with continued exploration.

About Zonia

The Zonia project is in Yavapai County, Arizona, and consists of 261 mineral claims and additional surface rights, all totaling 4,279.55 acres. It is a near-surface, copper-oxide resource and a brownfields site having already been mined in the late 1960s and '70s. The Project is at the PEA level and has been significantly de-risked with over 50,000 metres of drilling completed to date and with substantial amounts of detailed engineering completed.
