

# Progressive Planet Appoints Randy Gue, a CleanTech Industry Leader, to its Board

11.05.2023 | [CNW](#)

/NOT FOR DISTRIBUTION IN THE USA/

Randy, a trailblazer in commercializing recycling innovations, joins as Director as Dwayne Melrose moves to Advisory Board Member role

KAMLOOPS, May 11, 2023 - Progressive Planet (TSXV: PLAN) (OTCQB: ASHXF) ("Progressive Planet", "PLAN", or the "Company"), a leader in developing CleanTech solutions for the planet, is pleased to announce the appointment of Randy Gue as an independent member of its Board of Directors, effective immediately.

Randy is a global industry leader in the fields of recycling, reuse, and sustainability. Throughout his career, including 32 years with Lafarge North America, he oversaw or was directly involved with diverting almost one million tonnes of material from landfills for use in renewable energy streams or to replace conventionally mined raw materials. Randy is also dedicated to helping companies developing cutting-edge technologies in environmental and waste management fields scale into commercial businesses.

"My passion remains for resource recovery over landfilling, renewable energy, sustainable living, and clean technologies," said Randy. "I am enthused by the innovations Progressive Planet continues to develop for the cement and agricultural industries. I look forward to using my industry experience to assist with bringing them to the market on a global scale."

Progressive Planet has granted 300,000 stock options to Randy, exercisable at \$0.35 for a period of three years. The options have been granted in accordance with the Company's stock option plan.

The appointment of Randy coincides with the resignation of Dwayne Melrose from Progressive Planet's Board of Directors. Dwayne transitions into an Advisory Board Member role where he remains a Qualified Person (QP) to the Company.

"I am proud to have been a Progressive Planet board member," said Dwayne. "I remain excited to be an investor in Progressive Planet and to offer my expertise taking projects towards production as a member of the Advisory Board."

Progressive Planet recognizes Mr. Melrose for his leadership at Progressive Planet and his ongoing support. "I want to thank Dwayne for his continued support as a valued advisory board member of Progressive Planet," said Progressive Planet's CEO Steve Harpur.

Added Harpur: "As we aggressively move towards commercialization phase of major innovations at Progressive Planet, we are also pleased to welcome Randy, an industry leader, to our board to accelerate positive disruption to the cement, agriculture, and animal-care sectors through global distribution of products that reduce carbon footprints and restore the ecosystems we depend on."

Randy Gue is the President of Better Planet Consulting, working with clients in various industries to divert by-products and called "waste materials" from landfills. Randy worked for Lafarge for 32 years in various capacities ranging from engineering, project management to quality and process control. For the last 18 of those years, he worked as the Director of Business Development with primary responsibility for implementation of alternative fuel and raw material projects at Lafarge's plants in Western Canada and the USA, developing business relationships with numerous companies including Fortune 500 firms. Throughout his career, Randy was either directly involved or oversaw the beneficial reuse of almost one million tonnes of material used for either fuels or raw materials that would have otherwise gone to landfills.

Randy holds an MBA from Simon Fraser University and a Bachelor of Science in Mechanical Engineering from McMaster University.

About Progressive Planet:

We are a CleanTech and manufacturing company based in Kamloops, British Columbia, in the heart of some of Canada's richest volcanic fields, which are the prime ingredient of our innovations. Our expertise lies in merging CleanTech with ancient volcanic ash and recycled minerals to create planet-friendly products that fight climate change and protect our planet's health.

Our products are in 10,000+ retail stores across North America. Our innovations, created at our C-Quester&TRADE; Centre of Sustainable Innovation, are bringing positive disruption to the cement, agricultural and animal-care sectors to create products that contribute to reducing carbon footprints and restoring ecosystems.
