

Brigadier Gold Ltd. Prepared for Resumption of Field Work at Nemaska2 Lithium Project, Quebec

21.06.2023 | [ACCESS Newswire](#)

VANCOUVER, June 21, 2023 - [Brigadier Gold Ltd.](#) (the "Company") (TSXV:BRG | FSE:B7LM | USA:BGADF) announces mobilization is on stand-by for continuation of Phase-1 exploration at its recently expanded Nemaska2 Lithium Property ("Nemaska2"), James Bay, Quebec. Exploration at Nemaska2 was put on hold in early June due to wildfire concerns in many areas of Quebec. Crews were temporarily demobilized from Nemaska2, but not before successfully mapping and sampling pegmatite dykes in several locations. Exploration is anticipated to restart shortly after the lifting of prohibitions imposed by the Quebec government.

The focus of Phase-1 exploration remains to confirm and further delineate pegmatite outcrops mapped and sampled in historical government work programs which is anticipated to provide targets for a mid-summer 2023 drill program.

The Phase-1 program at Nemaska2 is being carried out by the Company's technical partner Géologica Groupe-Conseil ("Géologica") of Val D'or Quebec.

Spring 2023 Exploration Program

Exploration at Nemaska2 will feature a particular focus on the ~20 white pegmatite outcrops, each approximately 1,000 square metres in size. Particular attention will be applied to discover the possible existence of additional pegmatite dykes or other favorable structures. The Company anticipates this initial program will delineate targets for a mid-summer inaugural drill program.

"With the evolving fire situation in Quebec, Brigadier is anticipating continuation of its Phase-1 exploration program as soon as safety regulations allow", stated Robert Birmingham, President of Brigadier Gold. "While our initial program is under a brief hold, we are pleased to have completed mapping and sampling of pegmatite dykes in several zones at Nemaska2 prior to the fire ban."

Nemaska2 may be one of the most conveniently located properties in the region for access, logistics and infrastructure, which will allow Brigadier to conduct its exploration programs and publish results in an efficient and timely manner.

With the recently closed private placement the Company is fully funded to carryout Phase-1 exploration at Nemaska2.

Historical Exploration

The Quebec government has previously carried out a large sampling program and also an airborne magnetometric survey over Nemaska2 which shows the presence of several low magnetic anomalies likely corresponding with fractures or shear zones within the granitic Valiquette Pluton. These structures are generally favourable to the formation of pegmatites and other metals. The presence of pegmatites recognized during the regional reconnaissance mapping, anomalous values of Li and Cs in regional till sampling, and the presence of a major lithium deposit (Whabouchi Deposit) in the area, are all elements favourable to the existence of mineralization sought by the Company.

More information can be found in the National Instrument 43-101 technical report filed by the Company

under its SEDAR profile on March 14, 2023.

Qualified Person

Mr. Garry Clark, P. Geo., a member of the Company's Board of Directors, a "Qualified Person" under NI 43-101, has reviewed the technical contents of this news release and has approved the disclosure of the technical information contained herein.

Forward-Looking Information Cautionary Statement

This release includes certain statements and information that may constitute forward-looking information within the meaning of applicable Canadian securities laws. Forward-looking statements relate to future events or future performance and reflect the expectations or beliefs of management of the Company regarding future events. Generally, forward-looking statements and information can be identified by the use of forward-looking terminology such as "intends" or "anticipates", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "should", "would" or "occur". Forward-looking statements include those relating to the focus of the Phase-1 exploration program, the discovery of additional pegmatites, and target generation for and the timing of future drill programs. The Company cautions that all forward-looking statements are inherently uncertain, and that actual performance may be affected by a number of material factors, many of which are beyond the Company's control. Such factors include, among other things: risks and uncertainties relating to Company's ability to complete all payments and expenditures required under its mineral property option agreements; and other risks and uncertainties relating to the actual results of current exploration activities; the possibility that future exploration, development or mining results will not be consistent with adjacent properties and the Company's expectations; operational risks and hazards inherent with the business of mining (including environmental accidents and hazards, industrial accidents, equipment breakdown, unusual or unexpected geological or structural formations, cave-ins, flooding and severe weather); environmental and regulatory requirements; availability of permits, possibility of equipment breakdowns and delays, exploration cost overruns, availability of capital and financing, general economic, political risks, market or business conditions, regulatory changes, timeliness of government or regulatory approvals and other risks involved in the mineral exploration industry, and those risks set out in the filings on SEDAR made by the Company with securities regulators. Although the Company believes that the assumptions and factors used in preparing the forward-looking information in this news release are reasonable, undue reliance should not be placed on such information, which only applies as of the date of this news release, and no assurance can be given that such events will occur in the disclosed time frames or at all. The Company expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, other than as required by applicable securities legislation.

This news release does not constitute an offer to sell or a solicitation of an offer to buy any of the

securities in the United States. The securities have not been and will not be registered under the United States Securities Act of 1933, as amended (the "U.S. Securities Act") or any state securities laws and may not be offered or sold within the United States or to U.S. persons unless registered under the U.S. Securities Act and applicable state securities laws or an exemption from such registration is available.
