Founders Metals Drills 9.00 m of 11.10 g/t Gold and 12.20 m of 8.75 g/t Gold at Antino Gold Project

10.08.2023 | Newsfile

Vancouver, August 10, 2023 - Founders Metals Inc. (TSXV: FDR) ("Founders" or the "Company") announces additional drill core assay results from its maiden drill program at the Antino Gold Project in southeastern Suriname. The Company reports further high-grade gold intercepts as it continues to step-out from and expand gold mineralization in the Froyo Gold Zone. Rapid assay turnaround times allow Founders to continuously share results and demonstrate the incremental growth of this high-grade gold zone to depth and along strike.

Highlights

- Drillhole 23FR009 intersects 9.00 metres (m) core length of 11.10 grams per tonne (g/t) gold (Au) including 6 m of 15.92 g/t Au and 4.25 m of 19.29 g/t Au (Table 1, Figures 1&2)
- Drillhole 23FR010 returns 12.20 m core length of 8.75 g/t Au (Table 1, Figures 1&2)
- Highest grade assay to date from Drillhole 23FR007 at 0.95 m of 115 g/t Au
- The new gold intercepts demonstrate continuity of high-grade gold to depth and along strike (Figure 2)
- Over 3200 m of drilling to date with now consistent drill core recovery in saprolite zones above 90%

Table 1: Drilling Results

Drillhole	From (m)	To (m)	Interval (r	n)* Au (ppm)
23FR001	43.00	46.00	3.00	1.32
and	51.50	52.50	1.00	2.01
23FR003	23.00	29.00	6.00	1.78
23FR007	47.50	54.95	7.45	15.22
Incl	48.00	53.00	5.00	No Recovery**
Incl	54.00	54.95	0.95	115.00
23FR009	83.00	92.00	9.00	11.10
incl	87.00	91.25	4.25	19.29
23FR010	95.00	98.00	3.00	7.12
incl	97.00	98.00	1.00	19.10
23FR011	76.00	89.00	12.20	8.75
incl	80.00	85.00	5.00	17.59

^{*}Intervals are core length. At this early stage of exploration true widths are unknown.

Colin Padget, Founders' President and CEO, commented, "These latest results are excellent and demonstrate continuity of the high-grade gold mineralization at Antino. We are continuing to build on these results in the near-term but with our recent IP survey in hand and ground magnetics underway we are excited to soon start testing the high-priority drill targets coming out of the new data. We will be releasing details of this upcoming work soon."

Founders Metals' ongoing 2023 exploration program consists of up to 10,000 metres of diamond drilling, ground-based geophysical surveys, bedrock and structural mapping, surface geochemical surveying, and prospecting. The program aims to expand several high-grade historical gold zones to depth and along strike within the more than 8-kilometre-long Main Antino Shear Corridor as well as a series of proximal high-priority targets including previously overlooked intrusion-hosted bulk-tonnage targets.

About Founders Metals Inc.

Founders Metals is a Canadian exploration company operating in North and South America. The Company is focused on acquiring and advancing gold projects in the South American Guiana Shield. Its flagship project is the 20,000 ha Antino Gold Project in Suriname. Exploration work on the project includes, over 30,000 m of historical drilling, 35,000 gold-in-soil auger samples, property-wide aeromagnetic survey data, and a 2022 LiDAR survey. Antino is the most advanced gold exploration project in Suriname; within an area where historical surface/alluvial gold mining has produced over 500,000 gold ounces to date¹.

Quality Assurance and Control

Results from samples were analyzed at FILAB Suriname, a Bureau Veritas Certified Laboratory in Paramaribo, Suriname (a commercial certified laboratory under ISO 9001:2015). Samples are crushed to 75% passing 2.35 mm screen, riffle split (700 g) and pulverized to 85% passing 88 µm. Samples were analyzed using a 50 g fire assay (50 g aliquot) with an Atomic Absorption (AA) finish. For samples that return assay values over 10.0 grams per tonne (g/t), another cut was taken from the original pulp and fire assayed with a gravimetric finish. Founders Metals inserts blanks and certified reference standards in the sample sequence for quality control. External QA-QC checks are performed at ALS Global Laboratories (Geochemistry Division) in Vancouver, Canada (an ISO/IEC 17025:2017 accredited facility). A secure chain of custody is maintained in transporting and storing of all samples. Drill intervals with visible gold are assayed using metallic screening. Rock chip samples from outcrop/bedrock are selective by nature and may not be representative of the mineralization hosted on the project.

Cautionary Statement Regarding Forward-Looking Information

This press release contains "forward-looking information" within the meaning of applicable Canadian securities legislation. Forward-looking information includes, without limitation, statements regarding the use of proceeds from the Company's recently completed financings and the future or prospects of the Company. Generally, forward-looking information can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect ", "is expected ", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking statements are necessarily based upon a number of assumptions that, while considered reasonable by management, are inherently subject to business, market, and economic risks, uncertainties, and contingencies that may cause actual results, performance, or achievements to be materially different from those expressed or implied by forward-looking statements. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, other factors may cause results not to be as anticipated, estimated, or intended. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking information. Other factors which could materially affect such forward-looking information are described in the risk factors in the Company's most recent annual management discussion and analysis. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws.
