

FPX Nickel to Host Investor Webinar and Release Preliminary Feasibility Study on Baptiste Nickel Project

31.08.2023 | [CNW](#)

VANCOUVER, Aug. 31, 2023 - [FPX Nickel Corp.](#) (TSXV: FPX) (OTCQB: FPOCF) ("FPX" or the "Company") is pleased to announce that the Company will announce the results of a preliminary feasibility study ("PFS") on the Baptiste Nickel Project ("Baptiste") on September 6, 2023. The PFS will mark the culmination of the extensive de-risking and optimization program that has been undertaken since the issuance of the Baptiste 2020 preliminary economic assessment ("2020 PEA").

The Company's management will host a live webinar on Wednesday, September 6 at 10:00 a.m. Eastern (7:00 a.m. Pacific) to provide an overview of the Baptiste PFS results and to answer questions from participants. Participants can access the live webinar at the following link:

<https://www.renmarkfinancial.com/events/renmark-virtual-non-deal-roadshow-tsx-v-fpx-otcqb-fpocf-2023-09-06-100000>

A replay of the webinar will be available within 48 hours after the event at the following link:

About the Decar Nickel District

The Company's Decar Nickel District represents a large-scale greenfield discovery of nickel mineralization in the form of a naturally occurring nickel-iron alloy called awaruite (Ni₃Fe) hosted in an ultramafic/ophiolite complex. FPX's mineral claims cover an area of 245 km² west of the Middle River and north of Trembleur Lake, in central British Columbia. Awaruite mineralization has been identified in several target areas within the ophiolite complex including the Baptiste Deposit and the Van Target, as confirmed by drilling, petrographic examination, electron probe analyses and outcrop sampling. Since 2010, approximately US \$30 million has been spent on the exploration and development of Decar.

Of the four targets in the Decar Nickel District, the Baptiste Deposit has been the focus of increasing resource definition (a total of 99 holes and 33,700 m of drilling completed), as well as environmental and engineering studies to evaluate its potential as a bulk-tonnage open pit mining project. The Baptiste Deposit is located within the Baptiste Creek watershed, on the traditional and unceded territories of Tl'azt'en Nation and Binche Whut'en, and within several Tl'azt'enne and Binche Whut'enne keyohs. FPX has conducted mineral exploration activities to date subject to the conditions of agreements with First Nations and keyoh holders.

About FPX Nickel Corp.

[FPX Nickel Corp.](#) is focused on the exploration and development of the Decar Nickel District, located in central British Columbia, and other occurrences of the same unique style of naturally occurring nickel-iron alloy mineralization known as awaruite.
