

AmmPower Corp. Announces Assignment of Patent Rights

29.09.2023 | [The Newswire](#)

September 29 - Toronto, Ontario - [AmmPower Corp.](#) (CSE:AMMP) (OTC:AMMPF) (FSE:601A) (the "Company" or "AmmPower") an industry leader in innovative green ammonia solutions, is pleased to announce that a new ammonia synthesis converter technology designed for small production units has been granted a utility patent by the United States Patent and Trademark Office (USPTO).

Development of this advanced reactor technology, specifically targeted to provide small-scale and modular green ammonia production with unmatched efficiency, was managed by AmmPower Chief Technologist, Dr. Zhenyu Zhang, in cooperation with SANsyco Consulting, LLC and a group of experienced ammonia industry experts. Assignment of patent rights for the reactor technology to AmmPower has now been filed with the USPTO. In combination with AmmPower's know-how in product development and manufacturing, the modular Independent Ammonia Making Machine (IAMM™) is set to deliver reliable and cost-effective green ammonia production solutions and revolutionize the ammonia supply model worldwide.

"The successful issue of his patent and its assignment to AmmPower reflects our commitment to staying at the forefront of technological advancements," says Dr. Gary N. Benninger, CEO of [AmmPower Corp.](#)

The ammonia synthesis converter technology is also the subject of an international Patent Cooperation Treaty (PCT) application eligible to secure IP rights in PCT member states. The successful USPTO patent award and the PCT patent filing will further strengthen AmmPower's leading IP positions at a global scale in response to worldwide customer inquiries of the IAMM units.

About Ammpower

Ampower is a clean energy company focused on the production of green ammonia. The company is based in Toronto, Ontario, with a research and manufacturing facility in Southeast Michigan. The company is active in all facets of green ammonia production, including the production of green fertilizers, carbon free shipping fuel, and the 'cracking', or moving of green hydrogen as ammonia. The company is working on the development of proprietary technologies to produce green ammonia and green hydrogen at scale, including the investigation of unique catalytic reactions to bring down costs and to take advantage of carbon credits in the renewable energy space. Ampower currently holds several LOIs with ports in Brazil, the United States, and is currently completing its IAMM(TM) prototype to create green ammonia for the agricultural industry.

Forward-Looking Statements

This news release includes forward-looking statements that are subject to risks and uncertainties, including with respect to the expected timing of its name and ticker symbol changes. All statements within, other than statements of historical fact, are to be considered forward-looking. The Company provides forward-looking

statements for the purpose of conveying information about current expectations and plans relating to the future and readers are cautioned that such statements may not be appropriate for other purposes. By its nature, this information is subject to inherent risks and uncertainties that may be general or specific and which give rise to the possibility that expectations, forecasts, predictions, projections or conclusions will not prove to be accurate, that assumptions may not be correct and that objectives, strategic goals and priorities will not be achieved. These risks and uncertainties include but are not limited to those identified and reported in the Company's public filings under the Company's SEDAR profile at www.sedar.com. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking information, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements. The Company disclaims any intention or obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise unless required by law.

The Canadian Securities Exchange (CSE) has not reviewed, approved or disapproved the contents of this press release.
