About Emergent

Emergent is a gold and base metal exploration company focused on Nevada and Quebec. The Company's strategy is to look for quality acquisitions, add value to these assets through exploration, and monetize them through sale, joint ventures, option, royalty, and other transactions to create value for our shareholders (an acquisition and divestiture business model).

In Nevada, Emergent's Golden Arrow Property is an advanced stage property with a well-defined measured and indicated gold and silver resource. The New York Canyon Property is a copper skarn, copper porphyry, and gold exploration property south of and abutting the past producing Santa Fe Gold Mine. The Mindora Property (aka West Santa Fe Property) is a gold, silver, and base metal property located twelve miles from the Santa Fe Gold Mine and optioned to [Lahontan Gold Corp.](#) (TSXV:LG). Buckskin Rawhide East is a gold and silver property leased to Rawhide Mining LLC, operators of the Rawhide Mine.

In Quebec, the Casa South Property is a large gold exploration property adjacent to and south of Hecla Mining Corporation's (NYSE:HL) operating Casa Berardi Mine with multiple exploration targets identified. The Trecesson Property, located about 50 km north of the Val d'Or mining camp, has three gold exploration targets with multiple high-grade (>10 g/t) gold intercepts from historic and recent drilling. Also in Quebec, Emergent has a 1% NSR in the Troilus North Property, part of the feasibility stage Troilus Mine Property being explored by Troilus Gold. Emergent also has a 1% NSR in the East-West Property, owned by O3 Mining and part of their feasibility stage Marban Alliance Property.

Note that the location of Emergent's properties adjacent to producing or past producing mines does not guarantee exploration success at Emergent's properties or that mineral resources or reserves will be delineated.
