About Minera Alamos Inc.

Minera Alamos is a gold production and development Company. The Company has a portfolio of high-quality Mexican assets, including the 100%-owned Santana open-pit, heap-leach mine in Sonora that is currently going through the start-up of operations at the new Nicho Main deposit. The 100%-owned Cerro de Oro oxide gold project in northern Zacatecas has considerable past drilling and metallurgical work completed and the proposed mining project is currently being guided through the permitting process by the Company's permitting consultants. The La Fortuna open pit gold project in Durango (100%-owned) has a positive, robust preliminary economic assessment (PEA) completed, and the main Federal permits are in place. Minera Alamos is built around its operating team that together brought three open pit heap leach gold mines into successful production in Mexico over the last 14 years. Minera Alamos also wholly-owns the Copperstone mine and associated infrastructure in La Paz Country, Arizona, an advanced development asset with a permitted plan of operations that can be developed in parallel with planned project advancements in Mexico.

The Company's strategy is to develop very low capex assets while expanding the projects' resources and continuing to pursue complementary strategic acquisitions.
