About Teuton

Teuton owns interests in more than twenty-three properties in the prolific "Golden Triangle" area of northwest British Columbia and was one of the first companies to adopt what has since become known as the "prospect generator" model. This model minimizes share equity dilution while at the same time maximizing opportunity. Earnings provided from option payments (received in cash and often also in shares of the optionee companies), has provided Teuton with substantial income over the years. Teuton also owns many royalties in the Golden Triangle, including a 0.98% net smelter royalty in the core portion of the Treaty Creek property, host to the Goldstorm gold deposit.

Respectfully submitted,
